Sustainable Governance in Hybrid Organizations Linne Marie Lauesen, 2016-03-03 In *Sustainable Governance in Hybrid Organizations* the author Linne Marie Lauesen explores how businesses that have succeeded in conducting sustainable governance manage and govern their sustainable performance in other words how they manage to be economically socially and environmentally sustainable In this respect hybrid organizations that are formed as businesses with a mission to be sustainable and to provide services for society such as water companies are a good point of departure Water companies are highly regulated whilst working primarily for the betterment of society and on behalf of generations to come for whom clean and plentiful water and the preservation of nature is a must Linne Marie has dug deep into these types of hybrid organizations in order to reveal which mechanisms of organizational governance for sustainability are at play and how these organizations manage to balance their triple bottom lines in order to survive financially socially and environmentally and make a business out of their conduct

Balancing these three bottom lines in a sustainable way is explained in a clear and accessible way and the juxtaposition between non profit and for profit water companies will show how this model can be transferred to other business spheres

Challenging Territoriality in Human Rights Law Wouter Vandenhoele, 2015-06-19 Human rights have traditionally been framed in a vertical perspective with the duties of States confined to their own citizens or residents Interpretations of international human rights treaties tend either to ignore or downplay obligations beyond this territorial space This edited volume challenges the territorial bias of mainstream human rights law It argues that with increased globalisation and the impact of international corporations organisations and non State actors human rights law will become less relevant if it fails to adapt to changing realities in which States are no longer the only leading actor Bringing together leading scholars in the field the book explores potential applications of international human rights law in a multi duty bearer setting The first part of the book examines the current state of the human rights obligations of foreign States corporations and international financial institutions looking in particular at the ways in which they address questions of attribution and distribution of obligations and responsibility The second part is geared towards the identification of common principles that may underpin a human rights legal regime that incorporates obligations of foreign States as well as of non State actors As a marker of important progress in understanding what lies ahead for integrating foreign States and non State actors in the human rights dutybearer regime this book will be of great interest to scholars and practitioners of international human rights law public international law and international relations

International Investment Law and Globalization

Jean-Michel Marcoux,2018-09-03 In a context of neoliberal globalization have the processes of elaboration and implementation of foreign investors responsibilities by intergovernmental organizations reached the realm of legality Using an analytical framework and a methodology that combines international law with international relations this book provides a twofold answer to this question First it demonstrates that the normative integration of foreign investors responsibilities in international investment law is fragmented and consistent with the interests of the most powerful actors Second while using the interactional theory of international law to assess the normative character of several international instruments elaborated and implemented by intergovernmental organizations it highlights the sense of obligation that each instrument generates The analysis demonstrates that such a codification process is marked by relations of power and has resulted in several social norms with relatively few legal norms
