The International Law of Migrant Smuggling Anne T. Gallagher, Fiona David, 2014-07-21 Whether forced into relocation by fear of persecution civil war or humanitarian crisis or pulled toward the prospect of better economic opportunities more people are on the move than ever before. Opportunities for lawful entry into preferred destinations are decreasing rapidly creating demand that is increasingly being met by migrant smugglers. This companion volume to the award winning *The International Law of Human Trafficking* presents the first ever comprehensive in depth analysis into the subject. The authors call on their experience of working with the UN to chart the development of new international laws and to link these specialist rules to other relevant areas of international law including law of the sea human rights law and international refugee law. Through this analysis the authors explain the major legal obligations of States with respect to migrant smuggling including those related to criminalization interdiction and rescue at sea protection prevention detention and return.

**Migration Crises and the Structure of International Cooperation** Jeannette Money, Sarah P. Lockhart, 2019-01-15 Although international cooperation on migration is often promoted scholars have been unable to arrive at a consensus about the extent of cooperation in the current system. Under what conditions does international cooperation on migration arise and what shape does it take? These questions are important because migrants are often vulnerable to human rights abuses during their journeys as well as in the country of destination and international cooperation represents one mechanism for reducing this vulnerability. Jeannette Money and Sarah P. Lockhart ask these questions as they examine the patterns of migration flows during the post World War II period with particular attention to crises or shocks to the international system as in the case of migration following the recent conflicts in Afghanistan and Syria. Their analysis makes several important contributions to this debate. First they explain how the broad pattern of migration in

the contemporary era generally from poorer less stable countries to wealthier more stable countries fosters cooperation that is predominantly bilateral when cooperation does in fact occur Second they argue that cooperation is unlikely under most circumstances because countries of destination prefer the current system which privileges their sovereignty over migration flows Finally they posit that cooperation may arise under three conditions when the costs of maintaining the status quo increase when countries of origin locate a venue where their numbers allow them to control the bargaining agenda or when migrant flows tend toward reciprocity
