mobile phone why can't others around the world do the same? If 8 million entrepreneurs in China, one third of them women, can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater but not when the labor market is polarized. The internet can be a platform for universal empowerment but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its analog complements—the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens—have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What then should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone everywhere.

Farmers and Plant Breeding Ola Tveitereid Westengen, Tone Winge, 2019-10-02. This book presents the history of and current approaches to farmer breeder collaboration in plant breeding, situating this work in the context of sustainable food systems as well as national and international policy and law regimes. Plant breeding is essential to food production, climate change adaptation, and sustainable development. This book brings together experienced practitioners and researchers involved in collaborative breeding programmes across a diversity of crops and agro-ecologies around the world. Case studies include collaborative sorghum and pearl millet breeding for water stressed environments in West Africa; participatory rice breeding for intensive rice farming in the Mekong Delta; and evolutionary participatory quinoa breeding for organic agriculture in North America. While outlining the challenges, the volume also highlights the positive impacts, such as yield increases, farmers' empowerment in the innovation and development processes, contributions to maintenance of crop genetic diversity, and adaptation to climate change. This collection offers a range of perspectives on enabling conditions for farmer breeder collaboration in plant breeding in relation to biodiversity agreements such as the Plant Treaty, trade agreements, and related intellectual property rights (IPR) regimes and national seed policies and laws. Relevant to a wide audience including practitioners with experience in plant breeding and management of crop genetic resources, and those

with a broader interest in agriculture and development as well as students of international cooperation and development this volume is a timely addition to the literature

Land Tenure Reform in Sub-Saharan Africa Steven Lawry, Rebecca McLain, Margaret Rugadya, Gina Alvarado, Tasha Heidenrich, 2023-05-01 This book examines the impacts of land tenure reform interventions implemented in Benin Ethiopia Rwanda and Zimbabwe Since 2000 many African countries have introduced programs aimed at providing smallholder farmers with low cost certificates for land held under customary tenure Yet there are many contending views and debates on the impact of these land policies and this book reveals how tenure security agricultural productivity and social inclusion were affected by the interventions It analyses the results of carefully selected authoritative studies on interventions in Benin Ethiopia Rwanda and Zimbabwe and applies a realist synthesis methodology to explore the socio political and economic contexts Drawing on these results the book argues that inadequate attention paid to the core characteristics of rural social systems obscures the benefits of customary tenure while overlooking the scope for reforms to reduce the gaps in social status among members of customary communities This book will be of great interest to students and scholars of land management and use land and property law tenure security agrarian studies political economy and sustainable development It will also appeal to development professionals and policymakers involved in land governance and land policy in Africa The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
