Zoology continues to offer students an introductory general zoology text that is manageable in size and adaptable to a variety of course formats. It is a principles oriented text written for the non majors or the combined course presented at the freshman and sophomore level. Zoology is organized into three parts. Part One covers the common life processes including cell and tissue structure and function, the genetic basis of evolution and the evolutionary and ecological principles that unify all life. Part Two is the survey of protists and animals emphasizing evolutionary and ecological relationships, aspects of animal organization that unite major animal phyla and animal adaptations. Part Three covers animal form and function using a comparative approach. This approach includes descriptions and full color artwork that depict evolutionary changes in the structure and function of selected organ systems.

Marginalisation and Aggression from Bullying to Genocide Stephen James Minton, 2016-09-26 In this book the author proposes the existence of a continuum of aggressive marginalisation phenomena ranging from the unfortunately commonplace experiences of prejudice, discrimination and bullying behaviour through to genocide. Attempts made by researchers and practitioners to understand counter and prevent bullying behaviour are reviewed. A key finding has been that the success that has been accrued has been limited especially when the case of those who belong to so called minority groups who are often the target of prejudice outside of the school gates is considered. It is suggested that future anti bullying actions should meaningfully engage with prejudice as an underlying factor. After a critical consideration of the various psychological understandings of aggression, aggressive behaviour and marginalisation has been made, the author goes on to introduce and assess an eight stage model of physical genocide based primarily on insights from social cognitive psychology and exemplified in the history of the Lakota Cheyenne Campaign 1864-1890. This is followed by a consideration of the cultural genocide levelled against indigenous peoples exemplified in the Sami people in Norway and indigenous peoples of North America as implemented through the actions of educational systems and educators. The book ends with some suggestions being made regarding our potential to address the One and Other mindset that is proposed as underlying the continuum of aggressive marginalisation phenomena through the psychological understandings that we can offer the educational practice that we can provide and in the conscious acts of the affirmation of humanity we can make in our individual and collective choices. Stephen James Minton is a lecturer in the psychology of education at the School of Education Trinity College Dublin Ireland. He has extensive experience in the fields of anti bullying research and practice and is interested in the histories and psychosocial situations and especially the educational experiences of marginalised people.
