

UC Prompt 2 Sample

I am ambidextrous. That in itself is a pretty cool parlor trick, and a fun way to confuse fellow classmates and teachers. However, what I realized in my high school years was how much society is driven towards right-handedness. Many things, such as cars, aren't even designed for people who prefer driving with their left foot instead of their right. As a person who can write with both my left and right hands, I use my talent to raise awareness for the subtle discriminations that are present in society. For me, it is very important to help people understand the microaggressions that have been ingrained into our minds.

My idea for using my ambidextrous abilities came during class, when I had to take the worst seat in the room – right in front of the loud and blasting AC. To get out of sitting at the desk, I told my teacher that I was left handed. Rather than taking my word for it, she made me prove it by writing a paragraph with my left hand. Afterwards, she told me there were no seats for left-handed students and told me to have a seat next to her. After that experience, I began to notice that there were very few items made for people who were left handed. On the other side, right-handed people seemed to take for granted the designs that were designed with them in mind.

Since then, my activities for awareness have encompassed other arenas, such as topics on race and gender. I have organized rallies and social events to raise awareness on topics of discrimination. I hope to learn more about actions that inspired change in college. I strongly believe in equality and I will continue to work as hard as I can to see it achieved.
