Bio-Materials and Prototyping Applications in Medicine Paulo Jorge Bártolo, Bopaya

Bidanda, 2020-10-16 Rapid prototyping is used to design and develop medical devices and instrumentation This book details

research in rapid prototyping of bio materials for medical applications It provides a wide variety of examples of medical applications using rapid prototyping including tissue engineering dental applications and bone replacement Coverage also discusses the emergence of computer aided design in the development of prosthetic devices Ionic Liquids: Properties and Applications Francesca D'Anna,Jason Harper,2019-10-17 Sustainability defined as the way to meet the needs of the present generation without compromising the ability of future ones to meet their own is one of the main challenges of modern society Within this context chemistry plays a significant role and solvent nature as well as its environmental impact are pivotal issues frequently addressed Ionic liquids i e organic salts that have melting temperatures lower than 100 C have been frequently hailed as alternatives to conventional organic solvents Their greenness has been mainly ascribed to their low vapor pressure and flammability However in addition to this their high solubilizing ability and low miscibility with conventional organic solvents frequently allow for reducing the amount used as well as for their recycling Ionic liquids especially the ones featured by aromatic cations are frequently described as polymeric supramolecular fluids constructed through the establishment of feeble but cooperative supramolecular interactions like Coulomb and interactions as well as hydrogen bonds In general ionic liquids are also indicated as designer solvents as it is possible to tailor their features to specific applications by simply modifying their cation or anion structure In this way small changes in the ion s structure can give rise to solvents showing very different properties The above premises widely justify the growing interest in the properties and applications of ionic liquids seen in recent literature according to Scopus more than 27 000 papers published in the last five years have ionic liquids as a keyword Thanks to their properties they have been variously used as solvent media solvents for the obtainment of gel phases components in the building of dye sensitized solar cells media for the preparation of thermochromic materials etc This Research Topic aims to present how structural features can determine not only the properties of ionic liquids but also their possible employment In this latter case the interest arises from their ability to affect the outcome of a given reaction in terms of rate yield and nature of the products obtained for general use in the field of materials chemistry This article collection is dedicated to Prof Kenneth R Seddon for his outstanding contribution to the formation and development of the ionic liquids community *Chinese (Taiwan) Yearbook of International Law and Affairs, Volume 41, 2023* ,2024-12-30 Volume 41 of the Chinese Taiwan Yearbook of International Law and Affairs publishes scholarly articles and essays on international and transnational law as well as compiles official documents on the state practice of the Republic of China Taiwan in 2023 The Yearbook publishes on multidisciplinary topics with a focus on international and transnational law issues regarding the Republic of China Taiwan Mainland China and ASEAN **Transformation of Higher Education Institutions in Post-Apartheid South Africa** Chaunda L.
