while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

Rebels and Rage Adam Habib, 2019-03-01 Adam Habib, the most prominent and outspoken university official through the recent student protests, takes a characteristically frank view of the past three years on South Africa's campuses. In this new book, Habib charts the progress of the student protests that erupted on Wits University campus in late 2015 and raged for the better part of three years, drawing on his own intimate involvement and negotiation with the students and also records university management and government responses to the events. He critically examines the student movement and individual student leaders who emerged under the banners FeesMustFall and RhodesMustFall and debates how to achieve truly progressive social change in South Africa on our campuses and off. This book is both an attempt at a historical account and a thoughtful reflection on the issues the protests kicked up from the perspective not only of a high-ranking member of university management but also Habib as political scientist with a background as an activist during the struggle against apartheid. Habib moves between reflecting on the events of the last three years on university campuses and reimagining the future of South African higher education.
