Social Network Analytics Computational Research Methods and Techniques focuses on various technical concepts and aspects of social network analysis. The book features the latest developments and findings in this emerging area of research. In addition, it includes a variety of applications from several domains such as scientific research and the business and industrial sectors. The technical aspects of analysis are covered in detail, including visualizing and modeling network theory, mathematical models, the big data analytics of social networks, multidimensional scaling, and more. As analyzing social network data is rapidly gaining interest in the scientific research community because of the importance of the information and insights that can be culled from the wealth of data inherent in the various aspects of the network, this book provides insights on measuring the relationships and flows between people, groups, organizations, computers, URLs, and more. It examines a variety of data analytic techniques that can be applied to social networks, discusses various methods of visualizing, modeling, and tracking network patterns, organization growth, and change. It covers the most recent research on social network analysis and includes applications to a number of domains.

Handbook of Research on Digital Communications, Internet of Things, and the Future of Cultural Tourism Oliveira, Lída, 2022-01-28. Digital communication is significantly expanding new opportunities and challenges in the tourism industry. Tourists now more frequently than ever bring their smartphones with them to every destination, and cultural tourists are particularly motivated to utilize a variety of services and platforms as they are especially open and interested in understanding in detail the places and heritage of the places they visit. Thus, researchers, educators, and professionals in the tourism and hospitality field should take advantage of this opportunity to propose new ways of presenting better content and creating a more immersive and optimized experience for tourists. The *Handbook of Research on Digital Communications, Internet of Things, and the Future of Cultural Tourism* shares research and experiences on the convergence between digital communication and cultural tourism, specifically the migration and creative appropriation of these technologies for increased tourist engagement and their role in destination marketing and strategic planning and decision making. Covering topics such as big data, e-tourism, and social media platforms, this major reference work is an invaluable resource for researchers, students, professors, academicians, government entities, museum managers, professionals, and cultural tourism managers and facilitators.

Transactions on Computational Collective Intelligence XI Ngoc Thanh Nguyen, 2013-10-09. These transactions publish research in computer-based methods of computational collective intelligence (CCI) and their applications in a wide range of fields such as the semantic web, social networks, and multi-agent systems. TCCI strives to cover new methodological, theoretical, and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals, artificial and/or natural. The application of multiple computational intelligence technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This eleventh issue contains 9 carefully selected and thoroughly revised contributions.
