Human Development Report 2023/2024 United Nations Development Programme,2024-03-13 Today collective action on challenges ranging from climate change mitigation to peace and security is frustratingly slow or stymied altogether Lack of trust and polarization both associated with insecurity exacerbate the gridlock Shared interlinked global challenges like the pandemic and its recovery are outpacing our willingness and our institutions capacities to respond to them Why despite all our riches and technologies are we so stuck How do we get unstuck Is it possible to mobilize action to address globally shared challenges in a world that is intensively polarized The 2023 2024 Human Development Report explores these issues and offers a platform for strategic discussion on

Human Development and Global Institutions Richard Ponzio,Arunabha Ghosh,2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions it argues that human development has helped to preserve the continued vitality of major multilateral development programs funds and agencies It also details how human development faces new risks and threats caused by political economic social and environmental forces which are highlighted in a series of engaging case studies on trade water energy the environment democracy human rights and peacebuilding The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors

It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals energy transitions resource scarcity and expansion of democratic governance within and between nations Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world this book serves as a primer for scholars and graduate students of international relations and development It is also relevant to scholars of economics political science history sociology and women s studies *Human Development Report 2001* , **The Asia-Pacific Human Development Report** ,2008

Human Development Report 1996 United Nations Development Programme,1996 The Human Development Report now in its seventh edition updates the unique Human Development Indicators comparing human development in most countries of the world and the data tables on all aspects of human development The special focus of this edition is on the important link between economic growth and human development The Report maintains that the link is not automatic but can be established through proper policy management arguing the case for initiating and accelerating economic growth and at the same time accelerating and sustaining human development in different parts of the world The Report also maintains that the quality of growth is as important as its quantity otherwise growth can be jobless voiceless ruthless rootless and futureless It identifies employment as an important instrument in translating the benefits of economic growth into people s lives An indispensable resource for courses in international development the Report ranks 174 countries according to the Human Development Index HDI It also gives the global ranking of more than 100 countries in terms of Gender Related Development Index GDI and the Gender Empowerment Measure GEM The first index represents HDI taking into account gender inequality in capabilities and the second represents female opportunities in selected economic and political areas New to this edition is the Capability Poverty Measure CPM which is used as an alternative to the traditional income poverty measure The Report concludes that the future challenge is how to forge and sustain the desired kind of linkage between economic growth and human development in a globalized world which represents both opportunities and threats for the nations of the world

gender equality providing quality education for all helping people live healthy lives securing sustainable energy use and creating jobs offering sustainable livelihoods They also work towards equitable growth stable and peaceful societies greater efficiency in governance and closer international cooperation With indicators covering everything from air particulates to percentage of threatened animal species in a nation s total and informed by the latest research with inequality adjusted metrics for amenities such as education and healthcare this comprehensive study offers readers not only a wealth of valuable core data but also a well argued rationale for using the HGDI In today s world we cannot view our development as being distinct from and unaffected by that of the Earth we inhabit or that of our planetary cohabitants
