Autonorama Peter Norton,2021-10-21 The foundation has been laid for fully autonomous Elon Musk announced in 2016 when he assured the world that Tesla would have a driverless fleet on the road in 2017 It s twice as safe as a human maybe better Promises of technofuturistic driving utopias have been ubiquitous wherever tech companies and carmakers meet In Autonorama The Illusory Promise of High Tech Driving technology historian Peter Norton argues that driverless cars cannot be the safe sustainable and inclusive mobility solutions that tech companies and automakers are promising us The salesmanship behind the driverless future is distracting us from investing in better ways to get around that we can implement now Unlike autonomous vehicles these alternatives are inexpensive safe sustainable and inclusive Norton takes the reader on an engaging ride from the GM Futurama exhibit to smart highways and vehicles to show how we are once again being sold car dependency in the guise of mobility He argues that we cannot see what tech companies are selling us except in the light of history With driverless cars we re promised that new technology will solve the problems that car dependency gave us zero crashes zero emissions zero congestion But these are the same promises that have kept us on a treadmill of car dependency for 80 years Autonorama is hopeful advocating for wise proven humane mobility that we can invest in now without waiting for technology that is forever just out of reach Before intelligent systems data and technology can serve us Norton suggests we need wisdom Rachel Carson warned us that when we seek technological solutions instead of ecological balance we can make our problems worse With this wisdom Norton contends we can meet our mobility needs with what we have right now **Automotive Design Engineering** ,1991 Vehicle Electronics to Digital Mobility ,2004
