International Handbook of Leadership for Learning Tony Townsend, John MacBeath, 2011-07-10 The *International Handbook of Leadership for Learning* brings together chapters by distinguished authors from thirty one countries in nine different regions of the world. The handbook contains nine sections that provide regional overviews, a consideration of theoretical and contextual aspects, system and policy approaches that promote leadership for learning with a focus on educating school leaders for learning and the role of the leader in supporting learning. It also considers the challenge of educating current leaders for this new perspective and how leaders themselves can develop leadership for learning in others and in their organisations especially in diverse contexts and situations. The final chapter considers what we now know about leadership for learning and looks at ways this might be further improved in the future. The book provides the reader with an understanding of the rich contextual nature of learning in schools and the role of school leaders and leadership development in promoting this. It concludes that the preposition for between the two readily known and understood terms of leadership and learning changes everything as it foregrounds learning and complexifies rather than simplifies what that word may mean. Whereas common terms such as instructional leadership reduce learning to outcomes, leadership for learning embraces a much wider developmental view of learning.

Leading and Managing Open and Distance e-Learning (ODEL) Institutions in Africa Cuthbert Majoni, 2022-10-18 *Leading and Managing Open and Distance E Learning ODeL Institutions in Africa* focuses on e learning especially in developing countries in Africa. The outbreak of COVID 19 has forced most educational institutions including conventional institutions in higher education to embrace e learning as a tool to ensure that education is not paralysed but continues to thrive. However, the major challenge has been shifting focus from the conventional face to face mode to the e learning mode. This calls for a change of mindset and a review of practices to ensure success in implementing e learning. This book has 12 chapters that explore the leadership theories and approaches that influence administrative practices in ODeL institutions as well as student support within library and information services, the complexities of student affairs, the inclusion of students with special needs, the contemporary issues of innovation and industrialisation and effective marketing techniques for the survival and growth of tertiary institutions. It is hoped that the recipients of this book can acquire the theoretical and practical knowledge relevant to the successful implementation of e learning.

Handbook of Open Universities Around the World Sanjaya Mishra, Santosh Panda, 2025-06-27 The *Handbook of Open Universities Around the World* is the first collection to provide a comprehensive and critical overview of open universities internationally. Implementing National Qualifications Frameworks Across Five Continents Michael Young, Stephanie Matseleng Allais, 2016-04-08 This book assesses the impact and implementation of national qualifications frameworks in sixteen different countries It presents two major lessons for policy makers thinking of introducing a National Qualifications Framework NQF First that an NQF is only a way of framing existing provision it cannot on its own lead to the acquisition of skills or knowledge Second as an attempt to standardize learning something that is only to a limited extent standardizable NQFs have disadvantages as well as advantages The research was funded by the International Labour Organization ILO and the European Training Foundation ETF and partly as a result of the ILO ETF Report the Editors were asked by the World Bank to help them in advising the government of India on introducing a NQF for vocational qualifications Building on the findings of the report the editors of this book presented an NQF implementation strategy to the Government of India on behalf of the World Bank It laid out the steps and stages that would be involved and took account of the earlier experiences of introducing an NQF Although this strategy was prepared specifically for the Government of India others who have read it felt it deserved wider circulation The report has therefore been included in this volume Since this research was undertaken the number countries especially developing countries implementing or introducing a NQF has continued to increase This book will be of interest to policy makers and researchers This book was originally published as a special issue of the Journal of Education and Work

Zimbabwe's Transition to Democracy in the post independence era has been a very difficult one To date there have been a number of sustained efforts by various local regional and international actors to move Zimbabwe towards democracy as well as attempts to find a lasting solution to the political and economic crises that seriously affected the country's progress from the late 1990s However these attempts have been less successful mainly because Zimbabwe has complex political and economic problems with interlocking national regional and international political and economic dimensions rooted in both historical and contemporary factors and developments To understand the complexities of the challenges to Zimbabwe's transition to democracy as well as prospects for political change and democracy in the country Zimbabwe in Transition critically examines both the historical and contemporary dynamics shaping political and economic developments in the country taking into account voices from a broad spectrum of Zimbabwean society including civil society faith based communities the diaspora women community leaders the media youth and regional actors such as SADC and the AU Book jacket **Morgan Richard Tsvangirai's Legacy** Ngonidzashe Marongwe,2022-03-11 Morgan Richard Tsvangirai is arguably the most polarising figure and advocate of democracy and human rights in the history of opposition politics in Zimbabwe He is as much a topic of debate in Zimbabwe and beyond as the late president Robert Gabriel Mugabe Tsvangirai's legacy like Mugabe's remains indisputably controversial and conflicted Broadly the divided opinion on the Tsvangirai legacy can be represented firstly by those who argue that Tsvangirai was the champion of democracy and the face of the struggle for human rights in Zimbabwe In this light Tsvangirai has been variously described as a selfless people's hero a colossus of the struggle for democracy the commander of the struggle a symbol of courage and resistance and the doyen of constitutionalism in Zimbabwe On the other hand critics have described Tsvangirai as a sell out a Judas Iscariot traitor and coward among other nefarious and pejorative characterisations Drawing on all these opinions and the various characterisations of Tsvangirai this book provides a comprehensive and multi disciplinary appraisal of a gigantic trade

unionist and political figure who in his life and in death inspires different narratives emotions and values This book is therefore about a mortal but living figure who left an indelible mark on Zimbabwe Africa and the rest of the world in fields such as trade unionism governance and politics As such the book is handy for students and practitioners in African studies political science policy studies economics history global studies and development studies **From African Peer Review**

Mechanisms to African Queer Review Mechanisms? Nhemachena, Artwell, Warikandwa, Tapiwa Victor, 2019-04-22 Tracing recent bouts of globalised Mugabephobia to Robert Mugabe's refusal to be neoimperially penetrated this book juxtaposes economic liberalisation with the mounting liberalisation of African orifices Reading land repossession and economic structural adjustment programmes together with what they call neoimperial structural adjustment of African orifices the authors argue that there has been liberalisation of African orifices in a context where Africans are ironically prevented from repossessing their material resources Juxtaposing recent bouts of Mugabephobia with discourses on homophobia the book asks why empire prefers liberalising African orifices rather than attending to African demands for restitution restoration and reparations Noting that empire opposes African sovereignty autonomy and centralisation of power while paradoxically promoting transnational corporations centralisation of power over African economies the book challenges contemporary discourses about shared sovereignty distributed governance heterarchy heteronomy and onticology Arguing that colonialists similarly denied Africans of their human essence the tome problematises queer sexualities homosexuality ecosexuality cybersexuality and humanoid robotic sexuality all of which complicate supposedly fundamental distinctions between human beings and animals and machines Provocatively questioning queer sexuality and liberalised orifices that serve to divert African attention from the more serious unfinished business of repossessing material resources the book insightfully compares Robert Gabriel Mugabe Thomas Sankara and Julius Kambarage Nyerere who emphasised the imperatives of African autonomy ownership control and sovereignty over natural resources Observing Africans interest in repossessing ownership and control over their resources the book wonders why so much queer international attention is focused on foisting queer sexuality while downplaying more burning issues of resource repossession human dignity equality and equity craved by Africans for whom life is not confined to sexuality With insights for scholars in sociology development studies law politics African studies anthropology transformation decolonisation and decoloniality the book argues that liberal democracy is a fa ade in a world that is actually ruled through criminocracy *Policy for Open and Distance Learning* H. A critical engagement with theological education in Africa

Johannes J. Knoetze, Alfred R. Brunsdon, 2022-02-07 The higher education landscape has arguably become one of the most arduous to traverse More so in the African context where a host of variables continuously challenge educators to reflect critically on their philosophies and practices as they engage an ever changing audience In this book a critical engagement with theological education in Africa is offered As the book originates from South Africa it is presented as a South African perspective although contributors are situated across the African continent and abroad The common denominator is that all contributors are in some way or another invested in theological education in Africa The main contribution of this collaborative work is to be sought in the insights it offers on four main areas of theological education A historical and current

orientation on theological education in Africa some paradigm shifts in theological education in Africa ministerial formation needs versus theological education challenges and a critical reflection on elective models and methods The book presents the original and innovative research of scholars for fellow scholars involved in theological higher education as it is grounded in the respective fields of interest of each contributor It contributes to a better understanding of the complex African theological higher education landscape that is also mindful of post COVID 19 realities Methodologically the work draws on a combination of methods including literature studies empirical work and in some cases sectional offerings from doctoral studies as indicated in the various chapters Distance Education for Teacher Training Hilary Perraton, 2002-03-11

Distance education combining the use of correspondence texts broadcasting and limited opportunities for face to face study has been used in at least a hundred teacher training programmes over the last 25 years Distance Education for Teacher Training is the first comparative review of the use of distance education and open learning for the training and upgrading of teachers The book contains case studies using a broadly common format both to describe and analyse distance teacher training programmes in eleven countries across five continents The case studies describe the methods used to examine how far the craft of teaching can be studied at a distance Using a standardised microeconomic framework they provide unique data on the comparative costs of training teachers by distance and conventional methods The authors then draw general conclusions about the advantages and drawbacks of using distance education or open learning about the conditions for success and about comparative effects and costs Distance Education for Teacher Training will be of value to all concerned with teacher education whether in developing or industrialised countries and to those working in and planning for distance education and open learning
