Zimsec O Level June 2015 Statement Of Entry:

The Economics and Political Economy of African Air Transport Kenneth Button, Gianmaria Martini, Davide Scotti, 2017-09-14 Africa is the smallest of the regional aviation markets but one that Boeing and others expect to expand over the medium term. Developments on the continent that require the creation of robust and efficient air transport include growth in tourism, the export of exotics and the emergence of modern manufacturing and high tech industries. Africa's regional aviation markets generally lack good airports and air traffic control, viable airlines and adequately skilled labour. Airline safety is also a major concern. Written by a Who's Who of aviation specialists and policy makers, *The Economics and Political Economy of African Air Transport* fills an emerging void in the literature regarding Africa's aviation markets. Its original papers focus explicitly on the economic and political dimensions of the subject, although with relevance to the strategic planning and management of airlines and their associated infrastructure. Topics discussed include external and internal market efficiencies, air service liberalization, the emergence of new carriers, safety and security, low cost airline and other business models and airport economics. Focusing on the broader issues surrounding the subject, this book will be of interest to both the aviation community and those with an interest in economic and social development. *Routledge Handbook of Immigration and Refugee Studies* Anna Triandafyllidou, 2022-12-30 The *Routledge Handbook of Immigration and Refugee Studies* offers a comprehensive study of the multi-disciplinary field of international migration and asylum studies. The new edition incorporates numerous new chapters on issues including return migration, the relationship between urbanisation and migration, the role of advanced digital technologies in migration governance, decision making and human agency and the COVID-19 pandemic and its impact on global migration. Utilising contemporary information and analysis, this innovative Handbook provides an in-depth examination of the major analytical questions pertaining to migration and asylum, whilst discussing key areas such as work, welfare, families, citizenship, the relationship between migration and development, asylum and irregular migration. With a comprehensive collection of essays written by leading contributors from different world regions and covering a broad range of disciplines including sociology, geography, legal studies, political science and economics, the Handbook is a truly multidisciplinary reader. Organised into thematic and geographical chapters, the *Routledge Handbook of Immigration and Refugee Studies* provides a concise overview on the different topics and world regions as well as useful guidance for both the starting and the more experienced reader. The Handbook's expansive content and illustrative style will appeal to both students and professionals studying in the field of migration and international organisations.

COVID-19 Lockdowns and the Urban Poor in Harare, Zimbabwe Johannes Itai Bhanye, Fortune Mangara, Abraham R. Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio-economic impacts of the COVID-19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare, Zimbabwe. The authors look through the lenses of the urban health penalty, the right to the city, complexity theory and distributive justice theory. These four theories help

situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions Uniquely the authors use remote ethnography tools such as rich texts video diaries and photo uploads to provide evidence based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor threatening their right to the city The socio economic impacts can upsurge poverty increase unemployment and the risks of hunger and food insecurity reinforce existing inequalities and break social harmony in the cities even past the COVID 19 pandemic period These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy This means governments should provide social safety nets to informal sector operators whose income generating activities are affected the most during the time of emergencies like COVID 19 Planners and policymakers should re envision pandemic resilient cities that are just equitable resilient and sustainable
