Zimsec Exams 2015:

Regime and Education in Zimbabwe Bekithemba Dube, Albert Mufanechiya, 2024-06-10 This collection focuses on the post independence educational development in Zimbabwe It shows how the ZANU PF regime has presided over the demise of education and covers a wide range of topics such as violence against teachers poor salaries student activism minority languages and curriculum innovations This volume argues that the regime has used education as a tool for repression Curriculum innovations introduced and implemented in Zimbabwe have little to do with improving the performance of the learners and more to do with stopping teachers from pushing the regime change agenda Consequently this has resulted in a nation in crisis marked with high turnover poor economy and mass exodus of teachers and learners The contributors to this volume make various suggestions which could recenter education towards addressing the experiences of the learners as opposed to being used as a tool to push repression and thwart democracy **Restoring the Educational Dream.**

Rethinking Educational Transformation in Zimbabwe Shizha, Edward, 2013-12-07 The role of education in human well being and social development cannot be overestimated After a number of highly commendable policies on education in the first decade of independence the education system in Zimbabwe has taken a tumble that needs both examining and rectifying This volume analyses the challenges facing the education system in Zimbabwe and explores and scrutinises theoretical and practical possibilities for restoring the educational dream that was initiated at independence in 1980 The book is targeted at academics scholars college and university students policy makers and other stakeholders and advocates a multi pronged approach that must involve all stakeholders if educational retransformation reconstruction and restoration are to be achieved The authors provide a range of recommendations for a project that would restore the educational dream in Zimbabwe

Ancient and Indigenous Wisdom Traditions in African and Euro-Asian Contexts Ehaab Abdou, Theodore Zervas, 2024-08-01 This book brings attention to the understudied and often overlooked question of how curricula and classroom practices might inadvertently reproduce exclusionary discourses and narratives that omit or negate particular cultures histories and wisdom traditions With a focus on representations and classroom practices related especially to ancient and Indigenous wisdom traditions and cultures it includes unique contributions from scholars studying these questions in various contexts The book offers a range of important studies from key African and Euro Asian contexts including Afghanistan Albania Greece Iran South Africa Sweden T rkiye and Zimbabwe The various chapter contributions address and discuss nuances of each of the contexts under study The contributions also help highlight some key commonalities across these contexts including how dominant discourses and various forces have historically shaped and continue to shape and reproduce such omissions misrepresentations and marginalization In addition to seeking to reconcile with some of these ancient and Indigenous wisdom traditions and cultures the book charts a path forward towards more holistic analytical frameworks as well as more inclusive and balanced representations and classroom practices in these

aforementioned geographic contexts and beyond It will appeal to scholars researchers undergraduate and graduate students with interests in Indigenous education curriculum studies citizenship education history of education religion and educational policy *How to study for distinctions* Cosmas Mtsikwa ,2020-12-21 Thousands upon thousands fail in their examinations either by attaining average or poor grades This compellingly written book is of practical relevance to students who are at O level A level or even University and Tertiary education institutions to aid them to study and attain the attainable distinctions The young author of this book advocates implementation of the ten principles which address the common and rare mistakes which lead many to the bottomless pit of U s or ultimate failure It is apparent that the most educated fill the highly paying and honorable positions in the market place This book gives you the secret that is to be the distinction or one who stands shoulders above the rest By being that you will attain distinctions and honorable positions will be your reward Thus enjoy your interaction with this simply yet comprehensively written book **STEM Education in Poverty** Brantina

Chirinda,Gladys Sunzuma,Perkins Muredzi,2025-07-15 This book is about Science Technology Engineering and Mathematics STEM education in poverty and the lessons we learn from Zimbabwe The world is driving towards the fourth Industrial Revolution 4IR where economic growth has been attributed to STEM education STEM education is vital in this era where both developed and developing countries are undergo rapid changes Globally STEM education has been practised differently in schools and universities University programs new school curricula instructional methods extracurricular programs and professional development programs for in service teachers have been created to cater to STEM subjects STEM education is envisioned to produce critical thinkers inventors creators problem solvers innovators and professionals who will solve the world s ever changing challenges including inequity food insecurity climate change inequality and poverty STEM is essential to modern education Zimbabwe has faced significant economic challenges but has made remarkable strides in STEM education By examining the successes and challenges of STEM education in Zimbabwe we can learn valuable lessons about improving STEM education in underserved communities This book contributes to the international debate surrounding the optimal STEM education for students in underserved schools It incorporates detailed accounts of STEM education in Zimbabwe schools shedding light on the challenges students and educators face in impoverished areas In Zimbabwe STEM education faces significant challenges such as materials and facilities pedagogy policy reform access and relevance Some of the main issues highlighted in this book are the need for more resources including funding teaching materials and adequate laboratories Effective STEM pedagogy is hampered by an education system that emphasises the curriculum and teacher centred focus instead of focusing on how students can be taught or learn Research has shown that in Zimbabwe STEM teachers must apply inventive pedagogies and suitable learner centred STEM teaching approaches As a result there is a need for more STEM related programs and courses in schools and universities to improve the opportunities for students to pursue careers in these fields Another challenge is the need for more awareness about the opportunities and importance of STEM

education and interest in STEM subjects among students which can be attributed to a lack of exposure and understanding of the relevance and importance of these fields in today's world. While lack of resources and other challenges hinder effectiveness, opportunity lies in promising pathways of policy and practice. In Zimbabwe, there is a varying degree of success in the implemented competence-based curriculum which emphasises inquiry-based learning and STEM education. Finally, there is a need for early exposure to STEM-based career opportunities and for more collaboration between the government, private sector and educational institutions to address these challenges and promote STEM education in Zimbabwe. This book uses Zimbabwe as an example to explore STEM education in poverty. By examining the successes and challenges of STEM education in Zimbabwe, this book offers valuable insights into how STEM education can be integrated into the curriculum in countries with developing and emerging economies. This book is an essential resource for anyone interested in improving STEM education in underserved communities.

Perspectives in Curriculum Studies A Zama, N. Endeley, 2021-08-19

Perspectives in Curriculum Studies by Margaret Nalova Endeley and Martha Ashuntantang Zama is a comprehensive textbook for graduate students of Curriculum Studies and Instruction and a guide for education practitioners wherein they articulate contemporary curriculum concepts, principles and applications in the field. With illustrations from informed African perspectives, the authors situate curriculum theory and practice in local contexts so that African scholars, educators and others may be equipped with knowledge and skills to develop and maintain appropriate and relevant curricula for quality education. Framed in sixteen chapters grouped in five parts, the text begins with the exposition of basic terminology, curriculum theory and foundations of the curriculum, before delving profoundly into the curriculum development process. The latter portion gives the reader the opportunity to explore, analyse and evaluate different curriculum planning approaches and models, curriculum design dimensions and patterns and procedures for the development of syllabuses, textbooks and other curriculum materials. Also, Curriculum implementation tasks as well as strategies for evaluation of programs and courses are presented and discussed. Since curriculum and instruction are highly intertwined notions, instructional design is elaborately treated in two chapters, bringing out its theoretical underpinnings and procedures. The book closes with global perspectives of curriculum development in practice. The goal here is to provide insights into trends, issues and challenges not only in curriculum development but also in the curriculum field which should generate action towards the improvement of curriculum practice and spur the search for new knowledge.

Beyond the Enclave Godfrey Kanyenze, Timothy Kondo, 2011-07-26

Beyond the Enclave sets out to unravel the contradiction of a country Zimbabwe where a rich, diverse resource base co-exists with endemic poverty. One reason lies in the colonial economy which was predicated on an ideology of white supremacy, creating an enclave formal economy employing one-fifth of the labour force. Yet over three decades after independence, the non-formal segment has become even more entrenched. This book assesses Zimbabwe's economy through three main phases: 1980-90 when a strong social policy framework proved difficult to

sustain due to erratic growth and 1991-96 when structural adjustment demanded a market driven approach to development. The third phase is characterized by crisis management leading to policy inconsistencies and reversals. Not surprisingly such incoherence saw the economy descend into hyperinflation and paralysis in 2007-2008 leading to the signing of the Global Political Agreement in September 2008. In the absence of formal dollarization economic recovery after the adoption of the multi currency regime has remained fragile leaving an estimated 70 per cent of the population outside the banking system. This has further entrenched uneven enclave growth as the economy remains locked in a low income poverty trap. There is a need to facilitate transition towards formality to promote decent jobs. Furthermore a strategic developmental role for the state in the economy is now widely recognized as vital for development. Beyond the Enclave argues for a new approach to development in Zimbabwe based on pro poor and inclusive strategies which will contribute to the well being of all of its citizens and wise stewardship of its resources. It offers suggestions on policy formulation implementation monitoring and evaluation in all sectors designed to promote inclusive growth and humane development.
