Zimsec Registration June Session 2015:

Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events

Intellectual Property and International Trade: The TRIPS Agreement Carlos M. Correa, Abdulqawi A. Yusuf, 2016-06-27 The Agreement on Trade Related Aspects of Intellectual Property Rights TRIPS is the most far reaching and comprehensive legal regime ever concluded at the multilateral level in the area of intellectual property rights IPR Compared to prior IPR conventions TRIPS constitutes a major qualitative leap which radically modifies not only the context in which IPR are considered internationally but also their substantive content and the methods for their enforcement and dispute settlement This much welcomed treatise now in its third edition thoroughly updates its comprehensive analysis of the substantive provisions of the Agreement and their actual interpretation and application in different jurisdictions with new material on the burgeoning case law and on major changes in plant variety protection As in previous editions the book may be relied upon for in depth clarification of such matters as the following standards established under the agreement enforcement measures social and legal issues legal and policy possibilities offered legislative latitude allowed to WTO Member States incorporation of TRIPS into domestic law protection of integrated circuit design protection of innovation and R challenges raised by ongoing technological changes access to medicines protection of confidential undisclosed information and interface between competition law and intellectual property protection With fifteen chapters contributed by a distinguished panel of experts representing diverse parties international organisations legal practice government policy and academia the third edition offers an incomparable framework for understanding the background principles and complex provisions of the TRIPS Agreement Thoroughly revised and updated the third edition will be of great value to all professionals and business people concerned with international trade It stimulates further discussion and analysis in this area of growing importance to international law and international economic relations particularly regarding the possibilities offered by the Agreement and the loose ends that may need consideration in the future at the national or international level

Farmers' Crop Varieties and Farmers' Rights Michael Halewood, 2016-03-21 Over the last 50 years there has been a growing appreciation of the important role that farmers play in the development and conservation of crop genetic diversity and the contribution of that diversity to agro ecosystem resilience and food security This book examines policies that aim to increase the share of benefits that farmers receive when others use the crop varieties that they have developed and managed i e farmers varieties In so doing the book addresses two fundamental questions The first question is how do farmer management practices along with other factors such as environment and the breeding systems of plants affect the evolution and maintenance of discrete farmers varieties The second question is how can policies that depend on being able to identify discrete plant varieties accommodate the agricultural realities associated with the generation use

and maintenance of farmers varieties This focus on discreteness is topical because there are no fixed internationally recognized taxonomic or legal definitions of farmers varieties And that presents a challenge when developing policies that involve making specific discrete farmers varieties the subject of legal rights or privileges The book includes contributions from a wide range of experts including agronomists anthropologists geneticists biologists plant breeders lawyers development practitioners activists and farmers It includes case studies from Asia Africa Latin America and Europe where in response to a diversity of contributing factors there have been efforts to develop policies that provide incentives or rewards to farmers as stewards of farmers varieties in ways that are sensitive to the cultural taxonomic and legal complexities involved The book situates these initiatives in the context of the evolving discourse and definition of farmers rights presenting insights for future policy initiatives

The Settlement of Disputes Involving International Organizations August Reinisch, 2025-07-31 Disputes involving international organizations arise on both the international level as well as the level of domestic law These range from headquarters issues between States and international organizations to disputes between members as well as non members and international organizations which are settled before such diverse mechanisms as WTO ITLOS or regional international economic organization adjudication or arbitration In addition negotiation mediation and fact finding as non adjudicatory means of dispute settlement may be resorted to The more frequently arising disputes with private parties may be settled before international courts administrative tribunals arbitral tribunals and even national courts although the role of the latter is usually more limited because of the jurisdictional immunity regularly enjoyed by international organizations Based on an empirical overview of dispute settlement policy issues like access to justice the limited jurisdiction of courts and tribunals due process and adequate mechanisms of dispute settlement are discussed and some recommendations are made

Artificial Intelligence and Human Rights Law in Africa Aderomola Adeola, 2025-09-29 This book examines artificial intelligence AI in Africa from a rights based perspective In recent years technology has emerged as a significant disruptor with AI robotics and computer advancement in particular driving changes in societies around the world There are evident and daunting implications across contexts and continents and many countries are rapidly seeking to define patterns of solutions that can foster effective protection against the more challenging impacts of AI This book considers the consequences of AI for civil and political rights social economic and cultural rights and collective rights in Africa with particular reference to the African Charter It considers how AI risks violating the rights enshrined in the Charter and considers how the norms outlined in the African Charter can provide the basis for a response Overall this book examines how a rights based approach to AI can be realized emphasising the imperatives for steering implementation Providing an important guide for strategic action for the protection of human rights in the context of AI this book will be an important read for researchers policymakers and students in the fields of human rights and technology in Africa
