The event was hosted by Professor Ross Sparks CSIRO Mathematics Informatics and Statistics North Ryde Australia and was jointly organized by Professors S Knoth W Schmid and Ross Sparks. The papers presented here were carefully selected and reviewed by the scientific program committee before being revised and adapted for this volume.

Introduction to Statistical Quality Control Douglas C. Montgomery, 2019-12-30

Once solely the domain of engineers, quality control has become a vital business operation used to increase productivity and secure competitive advantage. *Introduction to Statistical Quality Control* offers a detailed presentation of the modern statistical methods for quality control and improvement. Thorough coverage of statistical process control (SPC) demonstrates the efficacy of statistically oriented experiments in the context of process characterization, optimization and acceptance sampling while examination of the implementation process provides context to real world applications. Emphasis on Six Sigma DMAIC (Define, Measure, Analyze, Improve, and Control) provides a strategic problem solving framework that can be applied across a variety of disciplines. Adopting a balanced approach to traditional and modern methods, this text includes coverage of SQC techniques in both industrial and non manufacturing settings, providing fundamental knowledge to students of engineering, statistics, business and management sciences. A strong pedagogical toolset including multiple practice problems, real world data sets and examples, provides students with a solid base of conceptual and practical knowledge.
