## WHAT IS A CV?

**CV** stands for **Curriculum Vitae**. It is a document highlighting an applicant's academic and professional history to convince an employer that they would be a valuable employee. The CV should tell your potential employer all about your education, your qualifications, and any skills you have that make you a prime candidate for the job. You can also include a small section about your personal life, but anything on the CV should be relevant to the position or industry you are applying for. You must include all of your contact information as well so that the employer can get in touch with you regarding their decision.

## WHAT ARE THE KEY DIFFERENCES?

### CV

### &

### RESUME

- a more extensive document than a resume
- can include more about yourself and your accomplishments to appeal to the employer
- can be any number of pages
- unlimited amount of information that can be included
- less flexible structure
- each category should be chronological to show your professional and academic progression

- makes more sense to forgo the categorization and strict formatting that is common with a CV
- typically only a page or two
- limited amount of information
- customize information more heavily for different positions
- more concise
- relevant skills, jobs, and achievements can be organized however the applicant thinks is best

## HOW TO WRITE A CV

- It is better to not make your application too extensive so that your potential employer can quickly get a feel for if you are the right candidate for the job.
- You get straight to the point by introducing yourself in a short personal profile and explaining what you could bring to the job.
- You should have your personal details visible right at the top of your CV and provide several means of contact, primarily an email address and a telephone number.
- You can move on to explaining your employment and academic history in their own sections.
- You should have a separate section where you bullet points your skills as well, but just list them and then go into depth about them when talking about your previous jobs and education to demonstrate how everything ties together to make you the perfect candidate.
- You should only mention things that are relevant to your application on the CV, so focus on outlining everything that made you feel ready to apply for the position and use this document as a way to show your potential employer the type of employee you would be.

Ackerman,2002 While many veterinarians choose to believe that expertise in medicine necessarily precludes having business sense nothing could be further from the truth In fact business and medicine are both evidence based disciplines with much in common When a patient is sick we use standard algorithms to determine the most likely causes and run appropriate diagnostic tests We do the same thing with a business that is in failing health We might run an inventory audit instead of a radiograph or look at financial statements rather than laboratory results but the problem solving approach is the same Once a medical problem is unearthed we prescribe appropriate treatment The same holds for businesses A practice may not need an antibiotic injection but an infusion of capital might be just what the doctor orders for an outdated facility Finally once the problem is corrected we periodically monitor the patient with wellness exams assuring continued health Businesses are no different We continue to take their vital signs benchmark them against established normals and make sure that they continue on a healthful trend What could possibly be a more natural extension of expertise than applying the same care to practice management as patient management      **Fundamentals of Care** Ian Peate,2017-02-23 Fundamentals of Care is an accessible introductory textbook for all health care assistants assistant practitioners and social care support workers who are undertaking the newly introduced mandatory Care Certificate as well as offering a resource for providing care and support Practically focused each chapter begins with the outcomes associated with each standard which helps contextualise and focus the reader on the content and relevance to the Care Certificate The book also includes exercises to encourage the reader to stop look listen and act thinking cap activity promotes further thinking and application to care and support provision along with case studies and resource files Written to help the reader come to terms with the role and function of the health and care assistants Fundamentals of Care offers support to those undertaking the Care Certificate and to assist those who already work as health and care assistants helping them in their quest to enhance safe and effective care      Using the Biological Literature Diane Schmidt,2014-04-14 The biological sciences cover a broad array of literature types from younger fields like molecular biology with its reliance on recent journal articles genomic databases and protocol manuals to classic fields such as taxonomy with its scattered literature found in monographs and journals from the past three
