Stephen Murray Chapter 14:

Handbook of Lesbian and Gay Studies Diane Richardson, Steven Seidman, 2002-11-18 Drawing from a rich team of global contributors and carefully structured to elucidate the core issues in the field this text is organised into four sections History and theory Identity and community Institutions and Politics

The History of Anthropology Regna Darnell, 2021-10 In *The History of Anthropology* Regna Darnell offers a critical reexamination of the Americanist tradition centered around the figure of Franz Boas and the professionalization of anthropology as an academic discipline in the late nineteenth and early twentieth centuries Focused on researchers often known as the Boasians *The History of Anthropology* reveals the theoretical schools institutions and social networks of scholars and fieldworkers primarily interested in the anthropology and ethnography of North American Indigenous peoples Darnell's fifty year career entails seminal writings in the history of anthropology's four fields cultural anthropology ethnography linguistics and physical anthropology Leading researchers theorists and fieldwork subjects include Edward Sapir Daniel Brinton Mary Haas Franz Boas Leonard Bloomfield Benjamin Lee Whorf Stanley Newman and A Irving Hallowell as well as the professionalization of anthropology the development of American folklore scholarship theories of Indigenous languages Southwest ethnographic research Indigenous ceremonialism text traditions and anthropology's forays into contemporary public intellectual debates *The History of Anthropology* is the essential volume for scholars undergraduates and graduate students to enter into the history of the Americanist tradition and its legacies alternating historicism and presentism to contextualize anthropology's historical and contemporary relevance and legacies

Recovering Ancestors in Anthropological Traditions Regna Darnell, Frederic W. Gleach, 2025 *Recovering Ancestors in Anthropological Traditions* focuses on individual scholars and national developments to build an understanding of a vital and diverse global discipline

Gay and Gray Raymond Mark Berger, 1996 In the absence of accurate information American culture has upheld a distorted view of what it means to be an older gay man *Gay and Gray* is the first and only scholarly full length treatment of older gay men in America today It breaks the stereotype that older gay men are strange lonely creatures and reveals that most older gay men are well adjusted to their homosexuality and the aging process This second edition contains four new chapters that present additional perspectives on the reality of gay aging Dr Minnigerode's study shows that older gay men do not perceive themselves as growing old faster than their heterosexual counterparts and that forty is the age at which most gay men believe that the label young no longer applies this finding led Berger and other researchers to define older gay men as those over forty Pope and Schulz confirm Berger's finding that for most older gay men a continuation of sexual activity and sexual enjoyment is the norm John Grube's paper on the interaction of older gay men with younger gay liberationists explores the cultural divide between today's older gay man and his younger counterpart filling a gap left in the first edition And a concluding chapter by Richard Friend on a theory of successful gay aging summarizes much of the current thinking about this topic The true situation of the older homosexual male presented in *Gay*

and Gray challenges preconceptions about what it means to be old and gay. It asserts that in most ways older gay men are indistinguishable from other older people. Because the book portrays older gay men in a realistic and sympathetic light, it is therapeutic for the many gay men who have been burdened with society's negative and distorted views about them. These men may compare their own lives to those of the respondents described in the book. Gay and Gray offers younger gay men a rare glimpse into their futures and enlightens and comforts those who count older gay men among their family and friends. The conclusions drawn in the book will change people's perspectives and offer new ways of thinking for and about older gay men. Gay and Gray is filled with rich case histories and treats its subject with dignity and compassion. Topics of focus include love relationships, social and psychological adjustment, gay community, self-acceptance, being in the closet, and coming out as a gay person, intergenerational attitudes, popular stereotypes. As the first intensive interview and questionnaire study of gay men aged 40 and older in America, Gay and Gray examines the lives of these men in light of cultural stereotypes. Author Berger asks about the social lives of these men, their involvement in both the heterosexual and homosexual communities, their coming out experiences, their attitudes about younger gays, their experiences in growing older, and their strategies for adapting to life's challenges. In the study, Berger reveals that, contrary to stereotypic views, most older gay men are well integrated into social networks and lead active and generally satisfying lives. He found that few live alone; most scored as well as younger gays on measures of psychological adjustment, such as self-acceptance; many are open about their homosexuality with family, friends, and colleagues; and the most well-adjusted older gay men were integrated into a homosexual community associated with younger gay men and were unwilling to change their sexual orientation.

A Culture of Improvement Robert Friedel, 2010-02-26

How technological change in the West has been driven by the pursuit of improvement: a history of technology from plows and printing presses to penicillin, the atomic bomb, and the computer. Why does technology change over time? how does it change, and what difference does it make? In this sweeping, ambitious look at a thousand years of Western experience, Robert Friedel argues that technological change comes largely through the pursuit of improvement: the deep-rooted belief that things could be done in a better way. What Friedel calls the culture of improvement is manifested every day in the ways people carry out their tasks in life, from tilling fields and raising children to waging war. Improvements can be ephemeral or lasting, and one person's improvement may not always be viewed as such by others. Friedel stresses the social processes by which we define what improvements are and decide which improvements will last and which will not. These processes, he emphasizes, have created both winners and losers in history. Friedel presents a series of narratives of Western technology that begin in the eleventh century and stretch into the twenty-first. Familiar figures from the history of invention are joined by others: the Italian preacher who described the first eyeglasses, the dairywomen displaced from their control over cheesemaking, and the little-known engineer who first suggested a grand tower to Gustav Eiffel. Friedel traces technology from the plow and the printing press to the internal combustion engine, the transistor, and the space shuttle.

Friedel also reminds us that faith in improvement can sometimes have horrific consequences as improved weaponry makes warfare ever more deadly and the drive for improving human beings can lead to eugenics and even genocide The most comprehensive attempt to tell the story of Western technology in many years engagingly written and lavishly illustrated *A Culture of Improvement* documents the ways in which the drive for improvement has shaped our modern world *The Baptist Home Mission Monthly*, 1905
