

APPLICATION

The Harmony® LC Surgical Lighting System is a variable pattern, variable intensity surgical lighting fixture designed to provide visible illumination of the surgical field or the patient for the operating room, ambulatory surgical center or intensive care unit staff.

DESCRIPTION

The Harmony LC Surgical Lighting System is a configurable, modular lighting system, providing high quality illumination for surgical and diagnostic applications. Harmony LC lightheads provide cool, shadow controlled, color corrected lighting, and includes an automatic lamp changeover system. Lighting intensity and lamp status are monitored and controlled by the Harmony LC control system which consists of a wall-mounted user interface panel controlled from micro-processor based controls mounted within the canopy or elsewhere in the ceiling. Light intensity level can also be adjusted by the surgeon, or other sterile surgical team member, using surgeon's control push buttons on any system light-head. Harmony LC lighthead illumination

(Typical only – some details may vary.)

pattern size is varied by twisting light-head lighthandles.

The Harmony LC system can be configured to meet the needs of a wide variety of applications ranging from simple diagnostic procedures to outpatient surgery

centers, as well as major surgical suites. Available configurations include one-, two-, or three-lighthead systems. The Harmony LC lighting system may be configured for effective use in exam and treatment rooms, hospital emergency departments, and hospital intensive care
