 on Shifting Ground* Cultural and Coastal Erosion in South Louisiana Nathalie Dajko introduces readers to the lower
 Lafourche Basin Louisiana where the land a language and a way of life are at risk due to climate change environmental
 disaster and coastal erosion Louisiana French is endangered all around the state but in the lower Lafourche Basin the shift to
 English is accompanied by the equally rapid disappearance of the land on which its speakers live *French on Shifting Ground*
 allows both scholars and the general public to get an overview of how rich and diverse the French language in Louisiana is
 and serves as a key reminder that Louisiana serves as a prime repository for Native and heritage languages ranking among
 the strongest preservation regions in the southern and eastern US Nathalie Dajko outlines the development of French in the
 region highlighting the features that make it unique in the world and including the first published comparison of the way it is
 spoken by the local American Indian and Cajun populations She then weaves together evidence from multiple lines of
 linguistic research years of extensive participant observation and personal narratives from the residents themselves to
 illustrate the ways in which language in this case French is as fundamental to the creation of place as is the physical
 landscape It is a story at once scholarly and personal the loss of the land and the concomitant loss of the language have

implications for the academic community as well as for the people whose cultures and identities are literally at stake
