International Perspectives and Strategies for Managing an Aging Workforce Ince, Fatma, 2022-03-11 Older employees are often seen as an obstacle and not as an opportunity for companies especially regarding the transfer of knowledge and experience. Effective development and utilization of older professional and managerial employees is an important issue as most organizations are not prepared to tailor their training methods to the needs and preferences of these employees due to negative stereotypes. Managing a rapidly aging workforce and sustaining economic dynamism calls for systematic research to prevent age discrimination due to an incomplete knowledge of older workers and politically challenging policy choices that require strong political commitments, robust management leadership and social consensus. *International Perspectives and Strategies for Managing an Aging Workforce* examines the differences in stereotypes of older employees compared to younger employees in companies, analyzes the impact of the aging workforce on retention, productivity and well-being and investigates organizational systems, processes and practices for managing older workers. Covering a range of topics such as retention and retirement, this reference work is ideal for researchers, academicians, practitioners, business owners, managers, human resource workers, instructors and students.
