Preparing Agriculture and Agriscience Educators for the Classroom Thoron, Andrew C., Barrick, R.

Kirby, 2022-06-24 The preparation of school based agriculture teachers has been a part of public education for over 100 years. However, there is a lack of texts available that address the components of teacher education in agriculture including teacher preparation and related activities. Further study that goes beyond concepts to include practice and applications is required in order to further develop educators in this sector. *Preparing Agriculture and Agriscience Educators for the Classroom* provides an up to date consideration of the best practices for developing and enhancing a complete teacher preparation program and highlights and showcases concepts and applications. It is a mainstay for teacher education and teacher preparation in agriculture and is applicable anywhere in the world where teaching agriculture exists. Covering a range of topics such as field experiences and student learning, this reference work is ideal for researchers, scholars, practitioners, academicians, administrators, instructors, and students.

Lifespan Developmental Systems Ellen A. Skinner, Thomas Kindermann, Andrew Mashburn, 2019-05-09 Everything you always wanted to know about theories, meta-theories, methods, and interventions but didn't realize you needed to ask. This innovative textbook takes advanced undergraduate and graduate students behind the curtain of standard developmental science so they can begin to appreciate the generative value and methodological challenges of a lifespan developmental systems perspective. It envisions applied developmental science as focused on ways to use knowledge about human development to help solve societal problems in real life contexts and considers applied developmental research to be purpose-driven, field-based, community engaged, and oriented toward efforts to optimize development. Based on the authors' more than 25 years of teaching, this text is designed to help researchers and their students intentionally create a cooperative learning community full of arguments, doubts, and insights that can facilitate their own internal paradigm shifts, one student at a time. With the aid of extensive online supplementary materials, students of developmental psychology as well as students in other psychological subdisciplines such as industrial, organizational, social, and community psychology and applied professions that rely on developmental training such as education, social work, counseling, nursing, health care, and business will find this to be an invaluable guidebook and toolbox for conceptualizing and studying applied problems from a lifespan developmental systems perspective.
