Strategic Modelling and Business Dynamics John Morecroft, 2007-09-10 John Morecroft's book is an ideal text for students interested in system modelling and its application to a range of real world problems The book covers all that is necessary to develop expertise in system dynamics modelling and through the range of applications makes a persuasive case for the power and scope of the approach As such it will appeal to practitioners as well as students Robert Dyson Professor of Operational Research Associate Dean Warwick Business School Much more than an introduction John Morecroft's Strategic Modelling and Business Dynamics uses interactive management flight simulators to create an engaging and effective learning environment in which readers whatever their background can develop their intuition about complex dynamic systems The numerous examples provide a rich test bed for the development of systems thinking and modelling skills John Sterman Jay W Forrester Professor of Management MIT Sloan School of Management This book with its vivid examples and simulators will help to bring modelling system dynamics and simulation into the mainstream of management education where they now belong John A Quelch Professor of Marketing Harvard Business School Former Dean of London Business School

This text fills the gap between texts focusing on the purely descriptive systems approach and the more technical system dynamics ones Ann van Ackere Professor of Decision Sciences HEC Lausanne Universit de Lausanne Strategic modelling based on system dynamics is a powerful tool for understanding how firms adapt to a changing environment The author demonstrates the appeal and power of business modelling to make sense of strategic initiatives and to anticipate their impacts through simulation The book offers various simulators that allow readers to conduct their own policy experiments Dr Erich Zahn Professor of Strategic Management Betriebswirtschaftliches Institut University of Stuttgart A website to accompany the book can be found at www.wiley.com/college/morecroft housing supplementary material for both students and lecturers Business Dynamics Models Eugenius Kaszkurewicz,Amit Bhaya,2022-11-24 This book introduces optimal control methods formulated as optimization problems applied to business dynamics problems Business dynamics refers to a combination of business management and financial objectives embedded in a dynamical system model The model is subject to a control that optimizes a performance index and takes both management and financial aspects into account Business Dynamics Models Optimization Based One Step Ahead Optimal Control includes solutions that provide a rationale for the use of optimal control and guidelines for further investigation into more complex models as well as formulations that can also be used in a so called flight simulator mode to investigate different complex scenarios The text offers a modern programming environment Jupyter notebooks in JuMP Julia for modeling simulation and optimization and Julia code and notebooks are provided on a website for readers to experiment with their own examples This book is intended for students majoring in applied mathematics business and engineering The authors use a formulation algorithm example approach rather than the classical definition theorem proof making the material understandable to senior undergraduates and beginning graduates

The business model cycle Sophia von Berg,2020-12-17 Today firms all over the world have to deal with dynamic business environments Fast moving digitalization has made information more transparent strengthening the role of the customer At the same time the provider can have a much closer relationship with the user thanks to real time communication However corporate practice does not have a process for developing dynamic business models and user centric business models that can be designed and changed using smart technologies have not yet been systematically integrated To stay competitive companies need to rise to this challenge The aim of this dissertation was to develop a dynamic user centric process model for business model design and change and to evaluate the model s ability to maintain a competitive advantage in the mobility sector First the differences between static dynamic and user centric business models and their corresponding attributes were deduced Then these findings were combined into a process model using system dynamics logic This model considers the user a co creator of value and helps managers react to real time changes in their business model environment Finally a mobility sector case study is presented to highlight the relevance of this model to real world application This business model cycle BMC supports the strategic management of dynamic user centric business model design and change activities It describes a

step by step procedure of business model design that includes ideation prototyping and integration of business model options Moreover it allows continuous monitoring of the business model environment and adaption of the model accordingly At the same time bidirectional interaction between the user and provider is possible allowing the provider to adapt to their users needs The BMC is unique in that these processes can take place simultaneously Finally the real world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage

Strategic Modelling and Business Dynamics, + Website John D. W. Morecroft, 2015-07-27 Insightful modelling of dynamic systems for better business strategy The business environment is constantly changing and organisations need the ability to rehearse alternative futures By mimicking the interlocking operations of firms and industries modelling serves as a dry run for testing ideas anticipating consequences avoiding strategic pitfalls and improving future performance Strategic Modelling and Business Dynamics is an essential guide to credible models helping you to understand modelling as a creative process for distilling and communicating those factors that drive business success and sustainability Written by an internationally regarded authority the book covers all stages of model building from conceptual to analytical The book demonstrates a range of in depth practical examples that vividly illustrate important or puzzling dynamics in firm operations strategy public policy and everyday life This updated new edition also offers a rich Learners website with models articles and videos as well as a separate Instructors website resource with lecture slides and other course materials see Related Websites Extra section below Together the book and websites deliver a powerful package of blended learning materials that Introduce the system dynamics approach of modelling strategic problems in business and society Include industry examples and public sector applications with interactive simulators and contemporary visual modelling software Provide the latest state of the art thinking concepts and techniques for systems modelling The comprehensive Learners website features models microworlds journal articles and videos Easy to use simulators enable readers to experience dynamic complexity in business and society Like would be CEOs readers can re design operations and then re simulate in the quest for well coordinated strategy and better performance The simulators include a baffling hotel shower a start up low cost airline an international radio broadcaster a diversifying tyre maker commercial fisheries and the global oil industry Much more than an introduction John Morecroft's Strategic Modelling and Business Dynamics uses interactive mini simulators and microworlds to create an engaging and effective learning environment in which readers whatever their background can develop their intuition about complex dynamic systems John Sterman Jay W Forrester Professor of Management MIT Sloan School of Management Illustrated by examples from everyday life business and policy John Morecroft expertly demonstrates how systems thinking aided by system dynamics can improve our understanding of the world around us Stewart Robinson Associate Dean Research President of the Operational Research Society Professor of Management Science School of Business and Economics Loughborough University **Innovative Solutions for Sustainable Supply Chains** Hassan Qudrat-Ullah, 2018-08-28 This

book presents the latest tools techniques and solutions that decision makers use to overcome the challenges faced by their sustainable supply chains Given the ever increasing significance of socio economic and environmental factors the management of sustainable supply chains has become a complex and dynamic task Multiple and conflicting objectives of stakeholders including suppliers manufacturers service providers and retailers add to the complexity of decisions that modern day managers of supply chains face With the unprecedented technological developments and innovations at hand sustainability can be maximized for all the activities of a supply chain including service concept and product design material sourcing and procurement manufacturing processes delivery of the final product and end of life management of the product Consequently the sustainable supply chains problems require a systematic and integrated approach Modeling and simulation in general as well as system dynamics and agent based modeling in particular have the capabilities to deal with the complexity of sustainable supply chain related problems This book will appeal to professionals and researchers in the field

The Dynamics of Care Eric Wolstenholme,Douglas McKelvie,2019-10-10 This book describes numerous projects which shed light on some of the most persistent issues of the day in health and social care The work demonstrates the importance of embedding the concept of flow into everyday health and social care thinking and creates insights into patient journeys through different conditions and treatments It suggests that improving throughput across agencies is the key way to improving the performance of health treatment whereas increasing capacity is the key way to improving the performance of social care by retaining independent living The authors conclude that for state provided care balancing health and social care provision can eliminate the many stressful fire fighting strategies hospitals have to undertake when faced with high demands and this is a win win scenario in terms of patients staff and costs Further that there is a need for better understanding of the dynamics of population ageing the dynamics of health conditions and the provision of better integrated information systems The book will be a valuable resource for practitioners clinicians managers and academics in health social work public health and public policy in many countries In this important book Eric Wolstenholme and Douglas McKelvie bring two lifetimes of award winning experience in applying system dynamics to improving our very clinically advanced but often dysfunctional care systems David F Andersen O Leary Distinguished Service Professor Emeritus State University of New York Albany USA Health and social care suffer from some persistent and serious problems which not only undermine well intended care but also impose considerable costs in many societies This very welcome and exceptional book offers the hope of sound and sustainable solutions to many of these issues Kim Warren Strategy Dynamics London UK African Swine Fever in Smallholder and Traditional Pig Farming Systems: Research, Challenges and Solutions Mary-Louise Penrith,Robyn Gwen Alders,Erika Chenais,Klaus Depner,Michel Dione,Ferran Jori,2022-05-10 *Water Management Challenges in Global Change* B. CCWI2007 and the Sustainable Urban Water Management SUWM2007 conferences The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods Issues such as economic globalisation climate changes and water shortages call for a new approach to water systems management which addresses the relevant technical social and economic aspects This collection represents the views of academic and industrial experts from a number of countries who provide technical solutions to current water management problems and present a vision for addressing the global questions The themes underlying many of the contributions include energy and material savings water savings and the integration of different aspects of water management The papers are grouped into three themes covering water distribution systems sustainable urban water management and modelling of wastewater treatment plants The water distribution topics cover asset and information management planning monitoring and control hydraulic modelling of steady state and transients water quality and treatment demand and leakage management optimisation design and decision support systems as well as reliability and security of water distribution systems The sustainable urban water management topics include urban drainage systems water reuse social aspects of water management and also selected facets of water resources and irrigation Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems To address this imbalance this book presents a number of modelling techniques developed specifically for these plants Water Management Challenges in Global Change will prove to be invaluable to water and environmental engineering researchers and academics managers engineers and planners and postgraduate students

Systems Approach to Management of Disasters Slobodan P. Simonovic, 2011-03-21 The main goal of this text is to introduce the systems approach to disasters management community

as an alternative approach that can provide support for interdisciplinary activities involved in the management of disasters. The systems approach draws on the fields of operations research and economics to create skills in solving complex management problems. The text is organized into four parts. Part I provides an introductory discussion of disaster management including an overview of the main terms used. Part II is devoted to the introduction of systems theory, mathematical formalization and classification of methods. The material presented in this section should be of practical relevance during the process of selecting an appropriate tool for the solution of a problem. Part III is technical in nature, providing a simulation approach and a detailed description of system dynamics simulation. This section details two areas of application: flood evacuation simulation and disaster risk assessment. Part IV ends with a chapter covering steps to improve disaster management. Finally, parts of the book can be used as a tool for specialized short courses for practitioners. For example, a course on System analysis for emergency management optimization could be based on Chapters 3, 4 and parts of Chapter 6. Included in the book is a CD with three computer programs: Vensim PLE, LINPRO and COMPRO. Vensim PLE (Personal Learning Edition) is state of the art simulation software used for the implementation of system dynamics simulation. The other two programs are LINPRO, a linear programming optimization tool, and COMPRO for the implementation of the multi objective analysis tool of compromise programming.

Managing Water Resources Slobodan P. Simonovic, 2012-05-23. This book bridges disciplines previously confined to specialist journal publications by providing a comprehensive overview of the systems analysis application to water resources. It is ideal for Masters level courses in Water Resources Engineering where modern management techniques of optimization and modelling are highly important in the strategic management of a vital resource. Derek Clarke, University of Southampton, UK. The great novelty of this book is that it presents in detail how fuzzy set theory can be used in water resource system management. The author was one of the pioneers who opened up this new field and is considered to be one of the greatest experts in it. Rodolfo Soncini Sessa, Politecnico di Milano, Italy. Water resources management is increasingly interdisciplinary and must take into account complex socioeconomic factors and environmental variables. This book describes the systems approach and its application to contemporary water resources management, focusing on three main sets of tools: simulation, optimization and multi objective analysis. This approach is presented within the context of sustainable planning and development under conditions of uncertainty. *Managing Water Resources: Methods and Tools for a Systems Approach* introduces system dynamic simulation as a tool for integrated modelling and contains coverage of the use of fuzzy sets for incorporating objective and subjective uncertainties. The book combines theory with many practical examples as well as including programs and exercises on downloadable resources. It comprises both an advanced text for students of water resources and civil or environmental engineering and a practical guide for professionals. Published jointly with UNESCO and International Hydrological Programme.

Navigating Strategic Decisions John E. Triantis, 2013-06-12. Based on four decades of experience and research, *Navigating Strategic Decisions* The

Power of Sound Analysis and Forecasting explains how to improve the decision making process in your organization through the use of better long term forecasts and decision support Filled with time tested methodologies and models it provides you with the tools to establish the organization processes methods and techniques required for analyzing and forecasting strategic decisions Describing how to foster the conditions required for forecasts to materialize this book will help you rank project valuations and select higher value creation projects It also teaches you how to Assess the commercial feasibility of large projects Apply sanity checks to forecasts and assess their resource implications Benchmark best in class strategic forecasting organizations processes and practices Identify project risks and manage project uncertainty Analyze forecasting models and scenarios to determine controllable levers Pinpoint factors needed to ensure that forecasted future states materialize as expected This book provides you with the benefit of the author s decades of hands on experience In this book John Triantis shares valuable insights on strategic planning new product development portfolio management and business development groups Describing how to provide world class support to your corporate market and other planning functions the book provides you with the tools to consistently make improved decisions that are based on hard data balanced evaluations well considered scenarios and sound forecasts *Business Performance Measurement and Management* Paolo Taticchi,2010-01-22 Measuring and managing the performance of a business is one of the most genuine desires of management Balanced scorecard the performance prism and activity based management are the most popular frameworks in this setting Based on the findings of R G Eccles acclaimed Performance Measurement Manifesto 1991 this book introduces new contexts and themes of application and presents emerging research areas related to business performance measurement and management e g SMEs and sustainability As a result of the 1st International Summer School Piero Lunghi on Perspectives of Business Performance Management this book is written both for students and academics as well as for practitioners looking for new yet proven ways to measure and manage business performance Diaminds Mihnea C. Moldoveanu,Roger L. TRIZ - The Theory of Inventive Problem Solving Denis Cavallucci,2017-07-25 The work presented here is generally intended for engineers educators at all levels industrialists managers researchers and political representatives Offering a snapshot of various types of research conducted within the field of TRIZ in France it represents a unique resource It has been two decades since the TRIZ theory originating in Russia spread across the world Every continent adopted it in a different manner sometimes by glorifying its potential and its perspectives the American way sometimes by viewing it with mistrust and suspicion the European way and sometimes by adopting it as is without questioning it further the Asian way However none of these models of adoption truly succeeded Today an assessment of TRIZ practices in education industry and research is necessary TRIZ has expanded to many different scientific disciplines and has allowed young researchers to reexamine the state of research in their field To this end a call was sent out to all known francophone research laboratories producing regular research about TRIZ Eleven of them agreed to send one or more of their postdoctoral researchers to present their work during a seminar regardless of the maturity or completeness of their efforts It was followed by this book project presenting one chapter for every current thesis in order to reveal the breadth the richness and the perspectives that research about the TRIZ theory could offer our society The topics dealt with e g the development of new methods inspired by TRIZ educational practices and measuring team impact

Supply Chain Simulation Francisco Campuzano,Josefa Mula,2011-07-16 Supply Chain Simulation allows readers to practice modeling and simulating a multi level supply chain The chapters are a combination of the practical and the theoretical covering knowledge of simulation methods and techniques the conceptual framework of a typical supply chain the main concepts of system dynamics and a set of practice problems with their corresponding solutions The problem set includes illustrations and graphs relating to the simulation results of the Vensim program the main code of which is also provided The examples used are a valuable simulation tool that can be modified and extended according to user requirements The objective of Supply Chain Simulation is to meet the demands of supply chain simulation or similar courses taught at the postgraduate level The what if analysis recreates different simulation scenarios to improve the decision making process in terms of supply chain performance making the book useful not only for postgraduate students but also for industrial practitioners

Whispering the Strategies of Language: An Mental Quest through **Sterman Business Dynamics Challenge Solution**

In a digitally-driven world where screens reign great and immediate communication drowns out the subtleties of language, the profound strategies and emotional nuances concealed within words often go unheard. Yet, situated within the pages of **Sterman Business Dynamics Challenge Solution** a captivating fictional value sporting with organic thoughts, lies an extraordinary quest waiting to be undertaken.
