Manual of Simulation in Healthcare

Richard H. Riley,2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide Simulation and skills centres have become established to integrate simulation into mainstream education in all medical nursing and paramedical fields Borrowing from the experience and methodologies of industries that are using simulation medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation Simulation has been used to enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins

with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anesthesia

Mechanical Circulatory Support in End-Stage Heart Failure Andrea Montalto, Antonio Loforte, Francesco Musumeci, Thomas Krabatsch, Mark S. Slaughter, 2017-07-14 This book is a detailed practical guide to the use of ventricular assist devices and total artificial hearts to provide mechanical circulatory support MCS in patients with end stage heart failure It explains why MCS may be indicated which patients require MCS when and how to implant ventricular assist devices or a total artificial heart and how to avoid potential complications of MCS Management throughout the period of care is described from preimplantation to follow up and both typical and atypical cases are discussed The text features numerous helpful tips and tricks relating to surgical and nonsurgical management and is supported by a wealth of high quality illustrations that document the preoperative evaluation and implantation techniques Heart transplantation remains the gold standard for the treatment of patients suffering from end stage heart failure but the shortage of donors has led to an increase in the use of MCS This book will assist all physicians and especially cardiologists and anesthesiologists who are involved in the care of these patients *PAIS Bulletin* ,1919 *Public Affairs Information Service Bulletin* ,1919 Bulletin of the Public Affairs Information Service Public Affairs Information Service,1919 *Energy Research Abstracts* ,1986
