Great Britain: Parliament: House of Commons: Work and Pensions Committee,2013-05-21 The Work Programme has the potential to work well for relatively mainstream jobseekers but is unlikely to reach the most disadvantaged long term unemployed people The Government spent some 248 million less on the Work Programme than anticipated in 2012 13 due to providers under performance in a payment by results programme In the short term the Committee urges the Government to use the unspent Work Programme budget to extend proven alternative provision for disadvantaged jobseekers such as the Work Choice programme for disabled people extend and continue to promote Access to Work to help disabled people overcome the practical difficulties of starting a job and provide further support for individuals who complete their two year attachment to the Work Programme without finding sustained employment The Committee also highlights that people with the severest barriers to work such as homelessness and serious drug and alcohol problems are often not ready for the Work Programme and need support first to prepare for it It recommends that DWP pilots ways of providing this additional support to prepare these groups for effective engagement with the Work Programme before they are referred In the longer term the Committee calls on DWP to consider moving away from the current differential pricing model which is based on the type of benefit a participant is claiming to a much more individualised needs based model The Report recommends that DWP should assess how a needs based pricing structure could determine the appropriate level of up front funding and the types of services required to support individual jobseekers
