We the Men Jill Elaine Hasday,2025 In a nation whose Constitution purports to speak for We the People too many of the stories that powerful Americans tell about law and society include only *We the Men* A long line of judges politicians and other influential scene setters have ignored women s struggles for equality or distorted them beyond recognition by wildly exaggerating American progress Even as sexism continues to warp constitutional law political decision making and everyday life powerful Americans have spent more than a century proclaiming that the United States has already left sex discrimination behind Jill Elaine Hasday s *We the Men* is the first book to explore how forgetting women s struggles for equality and forgetting the work America still has to do perpetuates injustice promotes complacency and denies how generations of women have had to come together to fight for reform and against regression Hasday argues that remembering women s stories more often and more accurately can help the nation advance toward sex equality These stories highlight the persistence of women s inequality and make clear that real progress has always required women to disrupt the status quo demand change and duel with powerful opponents America needs more conflict over women s status rather than less Conflict has the power to generate forward momentum Patiently awaiting men s spontaneous enlightenment does not Transforming America s dominant stories about itself can reorient our understanding of how women s progress takes place focus our attention on the battles that are still not won and fortify our determination to push for a more equal future *Nationalism*

and History Education Rachel Hutchins, 2016-02-26 History education by nature transmits an official version of national identity National identity is not a fixed entity and controversy over history teaching is an essential part of the process of redefining and regenerating the nation France and the United States have in particular experienced demographic and cultural shifts since the 1960s that have resulted in intense debates over national identity This volume examines how each country's national history is represented in primary schools social studies textbooks and curricula and how they handle contemporary issues of ethnicity diversity gender socio economic inequality and patriotism By analyzing each country separately and comparatively it demonstrates how various groups including academics politicians and citizen activists have influenced education and how the process of writing and rewriting history perpetuates a nation Drawing on empirical studies of the United States and France this volume provides insight into broader nationalist processes and instructive principles for similar countries in the modern world

Re-Membering History in Student and Teacher Learning Joyce E. King, Ellen E. Swartz, 2014-03-05 What kind of social studies knowledge can stimulate a critical and ethical dialog with the past and present *Re Membering History in Student and Teacher Learning* answers this question by explaining and illustrating a process of historical recovery that merges Afrocentric theory and principles of culturally informed curricular practice to reconnect multiple knowledge bases and experiences In the case studies presented K 12 practitioners teacher educators preservice teachers and parents use this praxis to produce and then study the use of democratized student texts they step outside of reproducing standard school experiences to engage in conscious inquiry about their shared present as a continuance of a shared past This volume exemplifies not only why instructional materials including most so called multicultural materials obstruct democratized knowledge but also takes the next step to construct and then study how re membered student texts can be used Case study findings reveal improved student outcomes enhanced relationships between teachers and families and teachers and students and a closer connection for children and adults to their heritage
