*Poverty and Social Deprivation in the Mediterranean* Maria Petmesidou, Christos Papatheodoru, 2013-07-04 In the growth of regional identities worldwide the Mediterranean Basin is emerging as an entity in its own right This book a unique collaboration among social scientists around the entire Mediterranean littoral covers Southern Europe Turkey the Balkans North Africa and the Near East Leading economists sociologists and social policy experts document with new and up to date empirical material the changing profiles of poverty and social deprivation The result is a thought provoking comparison of the extent severity and structural causes of poverty and social inequality and the huge diversity of public responses to the

challenges they pose      *Nasser's Gamble* Jesse Ferris,2013 Nasser s Gamble draws on declassified documents from six countries and original material in Arabic German Hebrew and Russian to present a new understanding of Egypt s disastrous five year intervention in Yemen which Egyptian president Gamal Abdel Nasser later referred to as my Vietnam Jesse Ferris argues that Nasser s attempt to export the Egyptian revolution to Yemen played a decisive role in destabilizing Egypt s relations with the Cold War powers tarnishing its image in the Arab world ruining its economy and driving its rulers to instigate the fatal series of missteps that led to war with Israel in 1967 Viewing the Six Day War as an unintended consequence of the Saudi Egyptian struggle over Yemen Ferris demonstrates that the most important Cold War conflict in the Middle East was not the clash between Israel and its neighbors It was the inter Arab struggle between monarchies and republics over power and legitimacy Egypt s defeat in the Arab Cold War set the stage for the rise of Saudi Arabia and political Islam Bold and provocative Nasser s Gamble brings to life a critical phase in the modern history of the Middle East Its compelling analysis of Egypt s fall from power in the 1960s offers new insights into the decline of Arab nationalism exposing the deep historical roots of the Arab Spring of 2011      **Artists and the Arab Uprisings** Lowell H. Schwartz,Dalia Dassa Kaye,Jeffrey Martini,2013-05-28 After decades of authoritarianism a wave of political change and unrest began to sweep across the Middle East and North Africa in early 2011 Successful democratic transitions will not be easy and will require change in multiple spheres This report focuses on one sphere whose power and importance is often underestimated the artistic arena Regional artists have the potential to positively contribute to democratic transition by shaping public debate in ways that support tolerance and nonviolence But Arab artists are often squeezed between the bounds of acceptable discourse set by rulers who fear freedom of expression and conservative societal groups that seek to control acceptable behavior Although the Arab uprisings lifted some previous barriers to artistic expression new limitations and challenges have emerged Moreover artists continue to lack sound funding models to support their work and face limited markets and distribution mechanisms This research explores the challenges posed by both the state and society in the region as well as the policy shifts that may be necessary to better support regional artists It also suggests new strategies in which regional actors and nongovernmental organizations take leading roles in supporting these artists and their work      **Non-Muslims in Muslim Majority Societies - With Focus on the Middle East and Pakistan** Kajsa Ahlstrand,Goran Gunner,2009-04-01 In a world where almost all societies are multi religious and multi ethnic we need to study how social cohesion can be achieved in different contexts In some geographical areas as in the Middle East and the Indian subcontinent people of different religious belonging have through the ages lived side by side sometimes in harmony and sometimes in dissonance In other geographical regions as in Scandinavia societies have been quite religiously homogeneous but only recently challenged by immigration The implication in both locations is that the relation between religious minority and majority is on the agenda In order to discuss the situation for Non Muslims in Muslim majority societies a consultation was convened with both Muslim

and Christian participants from Pakistan Palestine Lebanon and Sweden Some of the participants work in academic settings others in faith based organizations some in jurisprudence and others with theological issues This book is the result of that consultation the articles are works in progress and they remain tentative The intention with this anthology is to trigger reflection and further thinking It presents articles that discuss issues such as freedom of religion minority rights secular and religious legislation and inter religious dialogue in Muslim majority societies Contributors include Kajsa Ahlstrand G ran Gunner Mustafa Abu Sway Johan G rde Yasmin Haider Jan Hj rpe M Aslam Khaki Bernard Sabella Mehboob Sada Guirguis Ibrahim Saleh and Ahmad Salim This book is the second volume in Church of Sweden Research Series     **Arab Economies in the Twenty-First Century** Paul Rivlin,2009-02-09 This book examines the relationship between demographic growth and economic development in eight Arab countries Despite a slowdown in demographic growth as a result of the change in the age structure of the population the labor force is increasing rapidly In other parts of the world similar developments have enhanced economic growth In the Arab world however many of the opportunities presented by demographic transition are being lost resulting in serious threats to the political stability of the region The main reason for this is that the region has missed out on industrialization The book goes beyond conventional analysis to ask two closely related questions The first is why were governments so slow in tackling stability The second is why has the response been similar in apparently different economies Answers are provided using new literature in economics and economic history     *Reducing Global Poverty* Barry B. Hughes,Mohammad T. Irfan,Haider Khan,Krishna B. Kumar,Dale S. Rothman,Jose Roberto Solorzano,2015-12-22 This is the first volume in an ambitious new series Patterns of Potential Human Progress inspired by the UN Millennium Development Goals MGDs and other initiatives to improve the global condition The first and most fundamental of these goals reducing poverty worldwide is the focus of this book Using the large scale computer program called International Futures IFs developed over three decades at the prestigious University of Denver Graduate School of International Studies this book explores the most extensive set of forecasts of global poverty ever made providing a wide range of scenarios based on an authoritative array of data It transcends the 1 a day baseline measure of poverty and probes important concepts like income poverty gaps and relative poverty The forecasts are long term looking 50 years into the future far beyond the 2015 date set out by the MDGs They are geographically rich spanning the entire globe and drilling down to the country level including one of the most important global focal points India The poverty forecasts in this book and all the volumes in the series are fully integrated in perspective across a wide range of human development arenas including demographics economics politics agriculture energy and the environment Full of colorful thoughtfully designed graphs tables maps and other visual presentations of data and forecasts this large format inaugural volume ensures that the Patterns of Potential Human Progress series will become an indispensable resource for every development professional student professor library and indeed country around the world     *American Wars, American Peace* Philip D. Beidler,2007 As a writer Philip D Beidler has

often drawn on his combat experience in Vietnam and his deep engagement with American popular culture His essays tap these sources in powerful truth telling ways In *American Wars* American Peace another voice emerges distinct yet also tied to Beidler's wartime memories and his love of literature film and music It is the voice of one of the baby boom progeny of the Greatest Generation who at home and abroad became the foot soldiers not just in Vietnam but in the Peace Corps the civil rights movement the women's movement and beyond Beidler has experienced enough of history to question the kinds of peace that one empire after another has tried to impose on the world at whatever immense costs As he reflects on terrorism patriotism geopolitics sacrifice propaganda and more Beidler revisits his generation's inherited vision of national purpose and he asks what happened These essays are a sobering wake up call for even the most informed and conscientious citizen

**From Superpower to Besieged Global Power** Edward A. Kolodziej, Roger E. Kanet, 2010-01-25 The essays in this volume argue that the Bush Doctrine as outlined in the September 2002 National Security Strategy of the United States squandered enormous military and economic resources diminished American power and undermined America's moral reputation as a defender of democratic values and human rights The Bush Doctrine misguidedly assumed that the United States was a superpower a unique unipolar power that could compel others to accede to its preferences for world order In reality the United States is a formidable but besieged global power one of a handful of nations that could influence but certainly not dictate world events The flawed doctrine has led to failed policies that extend America's reach beyond its grasp most painfully evident in the wars in Iraq and Afghanistan Leading scholars and policy analysts from nine countries assess the impact of the Bush Doctrine on world order explain how the United States reached its current low standing internationally and propose ways that the country can repair the untold damage wrought by ill conceived and incompetently executed security and foreign policies Contributors focus on the principal regions of the world where they have expertise Asia Europe Africa the Middle East Latin America and Russia The contributors agree that future security and foreign policies must be informed by the limitations of U.S. economic cultural and military power to shape world order to reflect American interests and values American power and influence will increase only when the United States binds itself to moral norms legal strictures and political accords in cooperation with other like minded states and peoples
