transport and much more. Intended as a day to day reference for cable engineers, this book illuminates all the technologies involved in building and maintaining a cable system. But it's also a great study guide for candidates for SCTE certification and its careful explanations will benefit any technician whose work involves connecting to a cable system or building products that consume cable services.

Features: The much awaited second edition of an award winning book written by leading figures in the cable industry. Organized to follow the plant from signal creation through multiplexing, transmission and finally reception and processing within consumer's premises. Focuses on the practical, not the theoretical, and explains concepts and techniques using a minimum of mathematics. Covers both analog and digital signals as well as coaxial and fiber optic broadband distribution systems. Discusses system architecture in detail including considerations relating to digital fiber modulation and network reliability. Explores a wide range of customer interface issues including analog and digital video reception, consumer electronics and home networks.

About the Authors: Walter Ciciora is a Fellow of the IEEE, the SMPTE and SCTE and is a consultant in Cable Consumer Electronics and Telecommunications. He is a cofounder and CTO of HBA Matchmaker Media, a company with technologies in addressable advertising. Dr. Ciciora was cofounder and CTO of EnCamera Sciences, a company with technologies for embedding digital data in analog television signals until it was sold in 2000.
