Advances in inhalation safety assessment Victoria Hutter, Ewelina Hoffman, Thomas Hofmann, Mary Catherine McElroy, 2025-09-16 Inhalation toxicology refers to the route of exposure whereby an inhaled substance can cause direct local toxicity to the airways or exert their action systemically following absorption and metabolism Assessing the inhalation safety of substances is applicable to many sectors producing new products with intended or inadvertent inhaled exposure e.g. pharmaceutical chemical environmental consumer products Limitations with current tools and approaches to assessing inhalation safety prevent a high proportion of these products ever making it to market due to preclinical safety concerns in animals despite not understanding the relevance of these responses in humans Assessing the safety of substances in the lungs requires in depth knowledge of the properties of the inhaled aerosol deposition within the lungs interaction with biological barriers and the innate immune system and translation of these events to human safety As such advancements in inhalation toxicology rely on interdisciplinary research between the interfaces of the biological and physical sciences Assessing the inhalation safety of substances applicable to many areas which traditionally have used different approaches e.g. pharmaceutical chemical environmental consumer products However the challenges of providing relevant dosing replicating exposure categorizing adaptive and adverse responses and applicability of human relevant inhalation risk assessment remain a challenge to all sectors This research topic aims to explore new approaches and technologies within inhalation toxicity and other related fundamental research including aerosol characterisation which have the potential to answer the unmet needs within safety assessment

ECEL2006-5th European Conference on e-Learning, *Innovations in Applied Artificial Intelligence* Floriana Esposito, 2005-06-16 Intelligent systems are those which produce intelligent outputs AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real life problems The 18th International Conference on Industrial Engineering Applications of Artificial Intelligence Expert Systems IEA AIE 2005 held in Bari Italy presented such work performed by many scientists worldwide The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research The Committee enforced the rule that only original and unpublished work could be considered for inclusion in these proceedings The Program Committee selected 116 contributions from the 271 submitted papers which cover the following topics artificial systems search engines intelligent interfaces knowledge discovery knowledge based technologies natural language processing machine learning applications reasoning technologies uncertainty management applied data mining and technologies for knowledge management The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a research activity clearly aimed at consolidating the theoretical results that have already been achieved The conference program also included two invited lectures by Katharina Morik and Roberto Pieraccini Many people contributed in different ways to the success of the conference and to this volume The authors who continue to show their enthusiastic interest in

applied intelligence research are a very important part of our success We highly appreciate the contribution of the members of the Program Committee as well as others who reviewed all the submitted papers with efficiency and dedication

School Colin Conner, 2003-10-04 First Published in 2004 The terms assessment and testing conjure up all sorts of images in most people's minds Rows of desks in quiet halls working to the clock trying to remember the answers to obscure and sometimes irrelevant questions Recent invitations to teachers to reflect upon an occasion when they remember being assessed or tested drew up long forgotten memories of the 11 plus or taking a first driving test Often these were memories tinged with unhappiness sadness and a feeling of failure Assessment for many of us has been an emotional experience and it is not surprising that we should reject facing children with such experiences too early in their lives This book looks at assessment as a positive experience in the primary classroom as a fundamental feature of teaching and successful learning
