relevance including the separation of the church and state public funding of religious education the accommodation of students devotional needs and compulsory religious education The volume thus highlights the increasingly complex interplay of religion law and education in diverse educational settings and cultures across developing and developed nations Providing a valuable contribution to the field of religious secondary education research this volume will be of interest to researchers academics and educators with an interest in religion and law international and comparative education and those involved with educational policy at all levels Those more broadly interested in moral and values education will also benefit from the discussions the book contains **The Urban Ecologies of Divided Cities** Amira Osman, John Nagle, Sabyasachi

Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers Washed with Sun Jeremy A. Foster, 2008 Looking mainly at the

years following the British victory in the second Boer War from 1902 to 1930 Foster examines the influence of painting writing architecture and photography on the construction of a shared romanticized landscape subjectivity that was perceived as inseparable from being South African and thus helped forge the imagined community of white South Africa Africa's Buildings Itohan I. Osayimwese, 2025-09-23 A groundbreaking history of Africa's looted architectural heritage and a bold proposal for the repatriation of the continent's stolen cultural artifacts Between the nineteenth century and today colonial officials collectors and anthropologists dismembered African buildings and dispersed their parts to museums in Europe and the United States Most of these artifacts were cataloged as ornamental art objects which erased their intended functions and the removal of these objects often had catastrophic consequences for the original structures Africa's Buildings traces the

history of the collection and distribution of African architectural fragments documenting the brutality of the colonial regimes that looted Africa's buildings and addressing the ethical questions surrounding the display of these objects. Itohan Osayimwese ranges across the whole of Africa from Egypt in the north to Zimbabwe in the south and spanning the western central and eastern regions of the continent. She describes how collectors employed violent means to remove elements such as columns and door panels from buildings and how these methods differentiated architectural collecting from conventional collecting. She shows how Western collectors mischaracterized building components as ornament, erasing their architectural character and concealing the evidence of their theft. Osayimwese discusses how the very act of displacing building parts like floor tiles and woven screen walls has resulted in a loss of knowledge about their original function and argues that because of these removals, scholars have yet to fully grasp the variety and character of African architecture. Richly illustrated, *Africa's Buildings* uncovers the vast scale of cultural displacement perpetrated by the West and proposes a new role for museums in this history, one in which they champion the repatriation of Africa's architectural heritage and restitution for African communities.

The Hidden Power of Systems Thinking Ray Ison, Ed Straw, 2020-03-05

The Hidden Power of Systems Thinking: Governance in a Climate Emergency is a persuasive, lively book that shows how systems thinking can be harnessed to effect profound, complex change. In the age of the Anthropocene, the need for new ways of thinking and acting has become urgent. But patterns of obstacles are apparent in any action: be they corporate interests, lobbyists, or outdated political and government systems. Ison and Straw show how and why failure in governance is at the heart of the collective incapacity to tackle the climate and biodiversity emergencies. They go beyond analysis of the problem and demonstrate how incorporating systems thinking into governance at every level would enable us to break free of historical shackles. They propose 26 principles for systemic governance. This book will be inspiring reading for students applying their systemic methods, specialists in change management or public administration, activists for whole system change, and decision makers wanting to effect challenging transformations. It is for anyone with the ambition to create a sustainable and fair world.
