Routledge Handbook of Arts and Health Nicola Holt, Victoria Tischler, Elisabetta Corvo, Sofia Vougioukalou, 2025-11-28

This comprehensive Handbook defines surveys and critiques the burgeoning discipline of arts and health. It brings together the growing evidence base and discusses policy and practice from around the world. Divided into five sections, the Handbook introduces the discipline of the arts and health, explains its importance, and critically examines historical developments, current practice, research, theory, and policy. The first section looks at historical and contemporary approaches to the arts and health, including considerations from global perspectives and discussion of relevant models and frameworks for conceptualising it. The second section provides an overview of the main methods, applications, evidence base, and active ingredients of individual domains of art, such as the performing arts, creative writing, and the visual arts. The third section highlights how the arts are used to help with specific health needs and with specific populations, providing a more detailed overview of research and practice in key areas such as adult mental health and working with children and young people. In the fourth section, consideration is given to how the arts can be used and integrated with specific health professions, such as within public health interventions, forensic settings, psychiatry, schools, hospitals, and occupational therapy. The fifth section explores established and emerging theoretical perspectives, debates, and models for understanding the impact of the arts for health, including epidemiological, biological, social, ethical, and critical perspectives. The Handbook ends with a discussion of trends, complexities, and future directions in the field. A comprehensive overview of the expanding research and scholarship in the arts and health, this Handbook is an essential reference for all advanced students, scholars, and practitioners from a wide range of related backgrounds, including the health professions, psychology, education, and the medical humanities.

Farm Crime Joseph F. Donnermeyer, 2025-06-20. A little known and underappreciated area in criminology is knowledge about the extent, pattern, and costs of crime committed against agriculture. *Farm Crime: An International Perspective* is the first book to summarize the existing literature from across the globe about agricultural victimization. It demonstrates the vulnerability of farms and farm families to both property and violent crime and how it threatens their livelihood and lifestyles. Written by a pioneer of rural criminology, this book provides both a descriptive synthesis of agricultural victimization and a discussion of various criminological theories applied to its study. Despite the great diversity of farms in different regions of the world and the significant differences between the kinds of crime committed against farms from continent to continent, *Farm Crime* summarizes common areas of vulnerability. It provides a significant agenda for the future study of agricultural victimization, both in terms of its importance to issues of food security and the safety of farm families around the world. This book is essential reading for green criminologists, rural criminologists, mainstream criminologists, and sociologists alike. It will also be of interest to researchers and policymakers focused on issues of rural development, agricultural policy, and food security.

Trust, Courts and Social Rights David Vitale, 2024-02-07. *Trust, Courts and Social Rights* proposes an innovative legal framework for judicially enforcing social rights that is rooted in public trust in government or political trust. Interdisciplinary in nature, the book draws on theoretical and empirical scholarship on the concept of trust across disciplines, including philosophy, sociology, psychology, and political theory. It integrates that scholarship with the relevant public law literature on social rights, fiduciary, political theory, and judicial review. In doing so, the book uses trust as an analytical lens for social rights law, importing ideas from the scholarship on trust into the social rights literature and developing a normative argument that contributes to the controversial debate on how courts should enforce social rights. Also global in focus, the book uses cases from courts in Africa, Europe, Latin America, and North America to illustrate how the trust-based framework operates in
