significance in the business world is to take a gander at what business individuals talk about when the subject is BI Building up a BI Strategy utilizing the techniques we ll portray in this book is a human serious procedure as it ought to be We can use demonstrated methods however the nature of the results depends to a noteworthy degree on getting into the heads of key heads and chiefs How would they see their reality what are they hoping to achieve and how would they need BI to support them We can construct a business case that is slug verification from a consistent corporate point of view yet it likewise needs to reverberate with businessmen on a more instinctive level that squares with what they accept they would have the option to accomplish on the off chance that they would do well to BI So to put a human face on BI this section will step through the business difficulties and BI holes recognized by top heads in an assembling organization we ll call Big Brand Foods BBF We ll at that point sum up the BI Vision and BI Portfolio that risen up out of the system definition procedure and offer a few speculations about BI openings BIOs for other assembling organizations While we ve picked an assembling organization for this BI contextual investigation the rationale and procedure of recognizing industry challenges organization systems utilitarian difficulties and BIOs applies to any organization in any industry Further the perspectives on heads in the distinctive business capacities might be of incentive to chiefs in a similar capacity yet various businesses

**Cavitation Reaction Engineering** Y.T. Shah,A.B. Pandit,V.S. Moholkar,2012-12-06 The literature on cavitation chemistry is ripe with conjectures possibilities heuristics arguments and intelligent guesses The chemical effects of cavitation have been explained by means of many theories consisting of empirical constants adjustable parameters and the like The chemists working with cavitation chemistry agree that the phenomenon is very complex and system specific Mathematicians and physicists have offered partial solutions to the observed phenomena on the basis of cavitation parameters whereas chemists have attempted explanations based on the modes of reaction and the detection of intermediate chemical species Nevertheless no one has been able to formulate a unified theme however crude for its effects on the basis of the known parameters such as cavitation and transient chemistry involving extremely high temperatures of nanosecond durations When one surveys the literature on cavitation assisted reactions it is clear that the approach so far has been Edisonian in nature While a large number of reactions have showed either enhanced yields or reduced reaction times many reactions have remained unaffected in the presence of cavitation The success or failure of cavitation reactions ultimately depends on the collapse of the cavity Cavitation chemistry is based on the principles of the formation of small transient cavities their growth and implosion which produce chemical reactions caused by the generation of extreme pressures and temperatures and a high degree of micro turbulence
