Academic Governance in the Contemporary University Julie Rowlands, 2016-10-12 This book addresses three central questions in contemporary university governance 1 How and why has academic governance in Anglophone nations changed in recent years and what impact have these changes had on current practices 2 How do power relations within universities affect decisions about teaching and research and what are the implications for academic voices 3 How can those involved in university governance and management improve academic governance processes and outcomes and why is it important that they do so The book explores these issues in clear concise and accessible language that will appeal to higher education researchers and governance practitioners alike It draws on extensive empirical data from key national systems in the Anglophone world but goes beyond the simply descriptive to analyse and explain **University Governance in Canada**

Governance of British Higher Education Michael Shattock, Aniko Horvath, 2019-10-03 Book of the Week Times Higher Education Forms of institutional governance critically shape the culture creativity and academic outcomes of higher education The book provides a new updated and research based account of the changing face of the governance of British higher education Historically British universities were deemed amongst the most if not the most autonomous in Europe with governance rooted in their collegial disciplinary structures This assessment must now be decisively revised although the belief systems deriving from it remain buried deep in university culture Drawing on the authors investigation of the governance of higher education in the four UK nations including extensive on site interviews and discussions with government policy makers the book shows how global national and system level pressures have changed the face both of the external governance of higher education institutions and how universities govern themselves Government priorities new

funding methodologies and marketisation have all played a part in this process Since the mid 1980s there have been drastic changes in the external environment reinforced by the increasing diversity within the higher education system as a whole and between the national sub systems In addition a new private sector of higher education has been created New forms of institutional governance are emerging which may have profound effects on research and teaching and on academic creativity and innovation The study discusses the effects of a state regulated system compared with the more heterarchical system which preceded it It offers a comparison of the effects of devolved governance to Wales Scotland and Northern Ireland on the respective higher education systems and their impact on institutional governance The study concludes that England is becoming increasingly an outlier and discusses the long term implications for the coherence of a British higher education system Multiple Dimensions of University Governance and Performance Faisal Hani H. Governance Catherine Paradeise,Emanuela Reale,Ivar Bleiklie,Ewan Ferlie,2009-02-07 Higher education reforms have been on the agenda of Western European countries for 25 years trying to deal with self governed professional bureaucracies politically weakened by massification when an emerging common understanding enhanced their role as major actors in knowledge based economies While university systems are deeply embedded in national settings the ex post rationale of still on going reforms is surprisingly uniform and de nationalized They promote 1 the organizational turn of universities to varying extent substituting collegial loosely coupled entities by integrated goal oriented entities deliberately choosing their own actions and therefore open to differentiation that can thus be held responsible for what they do 2 the diversification of stakeholders supposedly offering solutions to problems as various as the democratisation of universities the shrinking of State budget resources and the diversification of university missions offering answers to changes in the making and in the use of science When it comes to accounting for these reforms two grand narratives of public management share the floor NPM implies a strengthening of the capacity of the core State to direct public services organizations through management by objectives and results or contractualization assessment evaluation and Governance focuses on network based governance systems where coordinating power and control are collectively shared between the major social actors or partners at all levels of the decision making system Our results suggest that all higher education systems under study were more or less transformed according to both these narratives It is therefore needed to understand how they combine or create contradictions This leads us to test a third neo weberian model This model reaffirms the role of the State of representative democracy central regional and local of public law suitably modernized preserves the idea of a public service with a distinctive status culture and terms and conditions It shifts from an internal orientation to bureaucratic rules towards an external orientation in meeting citizens needs and wishes by means of standardization of work processes and their products based on a distinctive public service and a particular legal order survived as the foundations beneath the various packages of modernizing reforms This book traces the national dynamics of public policies organizational design and steering tools in

seven European higher education and research systems using these narratives to interpret and test the actual changes and the degree of national specificities and European convergence This book is not a sum of national chapters like other presumably comparative It does not intend to tell once again the story of the transformation of the relationships between the state and universities It tries to use Higher education system to discuss issues on state intervention and steering and more generally the NPM governance and neo weberian models in a specific field Furthermore this book intends breaking the walls between specialists in higher education and specialist in public management and research policy This well rooted division of labour is less that ever justified as the university mission in research fundamental applied strategic is underscored by commentators and reformers themselves For that reason we have chosen to observe the consequences of the dynamics of public policies organizational design and steering tools on two specific issues related to the development of research training and organizing within universities the transformation of research funding on the one hand and the expansion of graduate studies and doctoral schools on the other

International Trends in University Governance Michael

Shattock,2014-06-05 Governance is becoming increasingly important in universities just as it is in the wider world of commerce and banking Historically universities were run by their academic communities but as mass higher education has taken root as university research has become a critical element in national economies and as the demand for more accountability both financial and in academic performance has grown pressure has mounted for a modernisation of governance structures One aspect of modernisation particularly important in many European systems and in Japan has been the decision by governments to give institutions greater autonomy more control over their budgets and legal responsibility for the employment of their staff International trends to introduce greater competition between institutions to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership a more systematic involvement of external stakeholders and a more corporate style of governance At the same time this has often led to a sense of loss of collegiality a redistribution of authority and a growing gap between the centre and the periphery within universities This book analyses governance change in nine major higher education systems Australia Finland France Germany Italy Japan Norway the UK and the USA each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical cultural political and social characteristics of the different systems Michael Shattock is a leading authority on university governance this study offers the most up to date account of governance reform in a range of higher education systems an analysis of the common trends and an assessment of their impact on the idea of a university It will be essential reading for academics postgraduates and practitioners in higher education
