ECSM2015-Proceedings of the 2nd European Conference on Social Media 2015 Dr Paula Peres, Dr Anabela Mesquita, 2015-07-06 Complete proceedings of the 2nd European Conference on Social Media Porto Portugal Published by Academic Conferences and Publishing International Limited **University on the Border** Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall. The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally. The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border. The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university **Campus Student Activism, Politics, and Citizenship in the 21st Century** Tshishonga, Ndwakhulu, 2025-04-03 Student activism and citizenship remain an integral part of the governance of academic institutions democratizing the learning environment and advancing democratic values and societal change. Mahokoto,Christo Thesnaar,2025-07-31 The world is groaning beneath a seemingly endless cycle of oppression and injustice This is particularly evident in Africa where colonization racism and violent conflicts have left deep scars on both nations and peoples In this collection of essays theologians from across Africa draw from their nations painful histories to grapple with the complex questions of reconciliation forgiveness and healing Using examples of religious ethnic and tribal conflicts across the continent these essays explore reconciliation and justice in the context of liberation theology biblical studies ecclesiology and pastoral care An excellent resource for peacemakers and academics alike this book offers a powerful and contextualized vision of the gospel s power to restore justice and offer true hope to a wounded world *Urban Agriculture and City*

Sustainability II S. Mambretti,J.L. Miralles i Garcia,2020-12-07 As urban populations continue to increase it is essential to consider ways of reducing their impact in terms of the use of natural resources waste production and climate change The increasing number of people in cities requires new strategies to supply the necessary food with limited provision of land and decreasing resources This will become more challenging unless innovative solutions for growing and distributing food in urban environments are considered The scale of modern food production has created and exacerbated many vulnerabilities and the feeding of cities is now infinitely more complex As such the food system cannot be considered secure ethical or sustainable In the last few years there has been a rapid expansion in initiatives and projects exploring innovative methods and processes for sustainable food production The majority of these projects are focused on providing alternative models that shift the power back from the global food system to communities and farmers improving social cohesion health and wellbeing It is therefore not surprising that more people are looking towards urban farming initiatives as a potential solution These initiatives have demonstrated that urban agriculture has the potential to transform our living environment towards ecologically sustainable and healthy cities Urban agriculture can also contribute to energy natural resources land and water savings ecological diversity and urban management cost reductions The impact urban agriculture can have on the shape and form of our cities has never been fully addressed How cities embed these new approaches and initiatives as part of new

urban developments and a city regeneration strategy is critical The 2nd International Conference on Urban Agriculture and City Sustainability addressed these challenges and the search for new solutions The presented papers which form this volume detail research works looking at how urban agriculture can contribute to achieving sustainable cities **ECCWS**

Universities in Africa Nico Cloete, Ian Bunting, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa *The South African State Transformed?* Louis A. Picard, Thomas M. Mogale, Caitlin C. Corrigan, 2024-09-10 This book examines the nature of the 1994 political transition in South Africa and its impact on post apartheid South Africa Specifically it examines the failures of liberalism within the context of the transitional process that led to the institution if not the practice of a non racial state in 1994 The term liberal is an eclectic term defining a several of views political and economic We use the term here within context but essentially define it as a commitment to open views the willingness to consider change and to value basic human rights The nature of institutional change in South Africa as it moved towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist democratic country or collapse into yet another African failed state As South Africa moves toward its fourth decade of majority rule the view towards the future is much less promising than it was in 1994 *A Scientific Bibliography of the Waterberg, Makgabeng Plateau, Blouberg and Soutpansberg* Rodney

Moffet,2025-06-16 The Scientific Bibliography of the Waterberg Makgabeng Plateau Blouberg and Soutpansberg follows two similar bibliographies of other mountain areas of South Africa This bibliography is particularly relevant as it covers many disciplines in two recently delared Niospher Reserves by UNESCO namely Waterberg and Vembhe **Handbook of Research on Connecting Research Methods for Information Science Research** Ngulube, Patrick,2019-12-13 In today s globalized world viable and reliable research is fundamental for the development of information Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science Building on previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge The Handbook of Research on Connecting Research Methods for Information Science Research is a collection of innovative research on the methods and application of study methods within library and information science While highlighting topics including data management philosophical foundations and quantitative methodology this book is ideally designed for librarians information science professionals policymakers advanced level students researchers and academicians seeking current research on transformative methods of research within information science Legal pedagogy, practice and curriculum transformation: What does the future hold and look like? Charles Maimela ,2025-07-18 In an era marked by rapid technological innovation and complex socio political shifts legal education stands at a critical crossroads This timely publication explores the imperative for a curriculum that is both responsive and resilient capable of adapting to the evolving needs of students institutions and society at large Blending theoretical analysis with practical insight the book offers forwardthinking strategies to navigate the multifaceted challenges of curriculum transformation Drawing on the lived experiences and reflections of law educators across diverse institutions it provides a unique lens into how curriculum innovation can enhance teaching learning and research in the legal academy More than a commentary this book is a call to action a vital resource for educators academic leaders and policymakers committed to ensuring the continued relevance excellence and social responsiveness of legal education in the 21st century

Utilisation of South African Research on Higher Education Jan Botha ,Gabriele Vilyte,2021-10-26 The relationship between research on the one hand and policy practice on the other hand is complicated and collaboration between scholars in research on higher education RHE and institutional research IR practitioners is often lacking This book marks a collaborative effort of a diverse range of South African RHE and IR scholars and asks the overarching questions What do we know about the utilisation of South African research on higher education SARHE and its subset of research known as Institutional Research How and by whom is this research used The book begins by looking at the historical underpinnings of SARHE and delineating the shape and size of this body of research This is followed by a series of case studies on South African Higher Education institutions and governmental bodies investigating how when and by whom are research on higher education and institutional research used in the decision making of these organisations This book is the first of its kind in

South Africa and sets out to lay the groundwork for further research into the use uptake and utilisation of RHE and IR in this country
