University Of Pretoria Mathematical Science Modules 2016:

Advances in Human Factors in Training, Education, and Learning Sciences Salman Nazir, Tareq Ahram, Waldemar Karwowski, 2020-06-30 This book addresses the importance of human factors in optimizing the learning and training process. It reports on the latest research and best practices and discusses key principles of behavioral and cognitive science which are extremely relevant to the design of instructional content and new technologies to support mobile and multimedia learning, virtual training and web based learning among others as well as performance measurements, social and adaptive learning and many other types of educational technology with a special emphasis on those important in the corporate, higher education, healthcare and military training contexts. Gathering contributions to the AHFE 2020 Virtual Conference on Human Factors in Training, Education and Learning Sciences held on July 16-20, 2020, the book offers a timely perspective on the role of human factors in education. It highlights important new approaches and ideas and fosters new discussions on how to optimally design learning experiences.

ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05
Positivity and its Applications Eder Kikianty, Mokhwetha Mabula, Miek Messerschmidt, Jan Harm van der Walt, Marten Wortel, 2021-07-22 This proceedings volume features selected contributions from the conference Positivity X. The field of positivity deals with ordered mathematical structures and their applications. At the biannual series of Positivity conferences, the latest developments in this diverse field are presented. The 2019 edition was no different with lectures covering a broad spectrum of topics including vector and Banach lattices and operators on such spaces, abstract stochastic processes in an ordered setting, the theory and applications of positive semi groups to partial differential equations, Hilbert geometries, positivity in Banach algebras and in particular operator algebras as well as applications to mathematical economics and financial mathematics. The contributions in this book reflect the variety of topics discussed at the conference. They will be of interest to researchers in functional analysis, operator theory, measure and integration theory, operator algebras and economics. Positivity X was dedicated to the memory of our late colleague and friend Coenraad Labuschagne. His untimely death in 2018 came as an enormous shock to the Positivity community. He was a prominent figure in the Positivity community and was at the forefront of the recent development of abstract stochastic processes in a vector lattice context.
