the South African Institute of Mining and Metallurgy South African Institute of Mining and Metallurgy,1978 Education and climate change Samantha Govender,Mncedisi C Maphalala,Dumisani W. Mncube,2025-06-15 The book highlights the critical yet often overlooked role of education in combating climate change It advocates for a transformative educational framework that integrates social emotional learning and interdisciplinary collaboration Traditional education which focuses solely on factual knowledge is deemed insufficient Instead education should foster empathy provide hands on experiences and encourage active engagement in climate solutions The book outlines various ways education can drive climate action such as raising awareness preparing individuals for green jobs empowering communities and fostering innovation in higher education It highlights the interconnectedness of climate change and education particularly for marginalised populations showing how quality education can enhance both mitigation and adaptation strategies while supporting Sustainable Development Goal SDG 4 and SDG 13 Key chapters discuss successful initiatives such as the Keep it Cool Climate Change Education KIC CCE project in South Africa and offer strategies for integrating climate change education into subjects like Natural Sciences and Geography Ultimately the book positions education as a strategic tool for promoting sustainable development and building climate resilience New research findings presented in the book connect education to climate change highlighting education as both a tool to address climate issues and a domain affected by these issues The book integrates empirical evidence innovative theories and practical examples to ensure intellectual integrity and academic rigour It introduces a unique framework that emphasises social emotional learning action oriented teaching and interdisciplinary collaboration Case studies such as the KIC CCE initiative in South Africa illustrate these concepts The book critiques traditional models and advocates for transformative approaches to climate education aligning with SDG 4 Quality Education and SDG 13 Climate Action It also highlights the significance of teacher preparedness community empowerment gender equality and innovation providing valuable insights for scholars policymakers and practitioners addressing the climate crisis

Imperial Ecology Peder ANKER,Peder Anker,2009-06-30 From 1895 to the founding of the United Nations in 1945 the promising new science of ecology flourished in the British Empire Peder Anker asks why ecology expanded so rapidly and how a handful of influential scientists and politicians established a tripartite ecology of nature knowledge and society Patrons in the northern and southern extremes of the Empire he argues urgently needed tools for understanding environmental history as well as human relations to nature and society in order to set policies for the management of natural resources and to effect social control of natives and white settlement Holists such as Jan Christian Smuts and mechanists such as Arthur George Tansley vied for the right to control and carry out ecological research throughout the British Empire and to lay a foundation of economic and social policy that extended from Spitsbergen to Cape Town The enlargement of the field from botany to human ecology required a broader methodological base and ecologists drew especially on psychology and economy They incorporated those methodologies and created a new ecological order for environmental economic and social

management of the Empire Table of Contents Acknowledgments Introduction From Social Psychology to Imperial Ecology General Smuts's Politics of Holism and Patronage of Ecology The Oxford School of Imperial Ecology Holism and the Ecosystem Controversy The Politics of Holism Ecology and Human Rights Planning a New Human Ecology Conclusion A World without History An Ecology of Ecologists Notes Sources Index Reviews of this book Peder Anker's Imperial Ecology is the unexpected story of how late imperial British ecologists took their arcane studies of marine life off Spitzbergen or the game of southern Africa and brought them to bear on very different areas of interest These ecologists fashioned from their studies a view of human ecology broad enough in this telling to embrace cycles of sexual activity in Japanese brothels famine in central Asia the building blocks for national economic planning and the cultural underpinnings of Nazism An eye opener Fred Pearce New Scientist Reviews of this book Few books are truly original however Anker puts an original perspective on the history of ecology linking two major schools of thought to the imperial aspirations of Great Britain The UK provided patronage grants to support ecologists who in turn provided important concepts strengthening Britain's imperial grip by enhancing resource management and incorporating human ecology into colonial ecosystems This thought provoking book provides many new insights into the history of a discipline It will be news to most ecologists whose knowledge of their own history is often sketchy at best J Burger Choice Anker has written a ruthlessly honest political and cultural history of ecology setting it firmly in the world of nineteenth century colonialism Illusions vanish here turn of the century ecology did not stand for a pure pacifism or an eden of natural harmony Instead we find that both the liberal mechanism of British ecologist Arthur George Tansley and the holistic ecology of South African statesman Jan Christian Smuts were both firmly built upon nationalism and a nationalism that mattered a great deal militarily racially and socially This is important work and a riveting read Peter Galison Harvard University

Language and Decoloniality in Higher Education Zannie Bock, Christopher Stroud, 2021-05-20 Language and Decoloniality in Higher Education brings together a collection of diverse papers that address from various angles the issue of decoloniality language and transformation in higher education It reflects the authors' cumulative years of experience as educators in higher education in different southern contexts Distilled as case studies the authors use a range of decolonial lenses to reflect on questions of knowledge language and learning and to build a reflexive praxis of decoloniality through multilingualism Besides a number of decolonial perspectives which readers will be familiar with this volume also explores a conceptual framework Linguistic Citizenship developed over the past two decades by scholars in southern Africa In this collection Linguistic Citizenship is used as a lens to think beyond the inherited colonial matrices of language which have shaped this region and many other southern contexts for centuries and to re-imagine multilingualism and semiotics more broadly as a transformative resource in the broader project of social justice Although each chapter has firm roots in the South African context these studies have much to offer others in their quest for better worlds Of particular interest to global scholars are the authors' recounts of how they have grappled with leveraging the

country's multilingual resources in the project of promoting academic access and success in the face of historical hierarchies of language and social power
