The History of Geophysics in Southern Africa Johan H de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century. However its phenomena like earthquakes, tsunamis, volcanic eruptions and lightning had been objects of fear, curiosity and speculation since ancient times. In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488. This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history. The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa.

The book establishes the role of green leadership in promoting responsible production, discusses the importance of measuring and reporting on sustainable innovation, including the use of sustainability metrics and reporting frameworks. Further, it debates the importance of incorporating ethics and sustainability in strategic management practices.
