Handbook of Theory and Practice of Sustainable Development in Higher Education Walter Leal Filho, Mark Mifsud, Chris Shiel, Rudi Pretorius, 2016-12-01 This Handbook approaches sustainable development in higher education from an integrated perspective addressing the dearth of publications on the subject. It offers a unique overview of what universities around the world are doing to implement sustainable development i.e. via curriculum innovation, research activities or practical projects and how their efforts relate to education for sustainable development at the university level. The Handbook gathers a wealth of information, ideas, best practices and lessons learned in the context of executing concrete projects and assesses methodological approaches to integrating the topic of sustainable development in university curricula. Lastly, it documents and disseminates the veritable treasure trove of practical experience currently available on sustainability in higher education.

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top-down leadership system of university management and its double-speak of professing to act in workers and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

Mergers in Higher Education Leon Cremonini, Saeed Paivandi, K.M. Joshi, 2019-05-23 The merger is broadly understood as a fusion of two or more units into one. The merger in higher education has received much attention by policy makers as well as individual institutions in many countries as a means to bring higher education reforms. The merger of higher education institutions is a visible phenomenon in the recent past, but each merger provides a distinctive instance of major strategic change. Besides this, each merger also shows a distinct set of circumstances, actors and characteristics. The aims of the mergers have been varied across the nations that include a reduction in fragmentation of institutions, economies of scale, enhanced efficiency, enhanced quality, etc. Along with disapproval, a great amount of literature surrounding the benefits of the merger has emerged over the period of time. In spite

of ample literature on mergers of higher education institutions there does not appear to be a clear set of financial efficiency or quality parameters to assess the success. The majority of the discussions have been narratives. In the available literature the mergers have been classified based on their participants stakeholders nature the strategy that drives them their motivation and or the resultant degree of absorption. This book discusses the merger experiences and case study of different countries in terms of policies and practices. Each country chapter in the above context narrates that in planning the mergers what have been the philosophical economic political legal and cultural implications. How the factors such as institutional history geographical distance provincial tradition state regulations the presence of collective bargaining and pertinent financial matters shaped the process as well as the outcome of the mergers. The idea of merger and its implementation including process at both government and institutional level have been discussed. The outcome assessment also forms the part of the discussion.

Technical Universities Lars Geschwind, Anders Broström, Katarina Larsen, 2020-08-28. This Open Access book analyses the past present and future of the technical university as a single faculty independent institution. The point of departure is a view of changing academic realities through which the identity as a technical university is challenged and reconstituted. More specifically the book connects the development of technical universities to changes in the structure and dimensioning of national higher education systems to changes in the disciplinary basis of academic research and to changes in the governance of higher education institutions. Introduced in the age of industrialization polytechnical schools rose to prominence in many national settings during the second half of the 19th century. Over time new technologies have been developed and incorporated into the repertoire and waves of academisation have swept over the former polytechnics transforming them into technical universities. Their traditions and brands however prevail. Several technical universities are included among the most prestigious academic institutions of their nations and the training of engineers and engineering research still enjoys a high level of prestige and national priority e.g. in the context of innovation and industrial policy. But the world keeps changing and the higher education sector with it. Will technical universities have an equally attractive position within university systems in the decades to come?

African Languages in Classrooms and Academia: Intellectualisation and Empowerment through Formal Education Xolisa Tshongolo, 2024-12-02. To

date there have been few comprehensive books published which deal specifically with the role of African languages in academia and formal education Motinyane Mletshe and Tshongolo as editors have produced a book that fills this gap In this timely collection of 21 chapters written in African languages and English the contributors offer a critique of both language practice in the classroom as well as language planning policy creation and implementation challenges A timely and innovative contribution in the area of language in education teaching pedagogy as well as multilingualism ICICKM 2016 - Proceeding of the 13th International Conference on Intellectual Capital Knowledge Management & Organisational Learning Scott Erikson,Helen Rothberg, Proceedings of the 13th International Conference on Intellectual Capital Knowledge Management Organisational Learning held at Ithaca College NY USA on 16 17 Septemeber 2016 Geospatial Data in a Changing World Tapani Sarjakoski,Maribel Yasmina Santos,L. Levander,Wieland Wermke,2022-01-03 This open access volume explores peer review in the scientific community and academia While peer review is as old as modern science itself recent changes in the evaluation culture of higher education systems have increased the use of peer review and its purposes forms and functions have become more diversified This book put together a comprehensive set of conceptual and empirical contributions on various peer review practices with relevance for the scientific community and higher education institutions worldwide Consisting of three parts the editors and contributors examine the history problems and developments of peer review as well as the specificities of various peer review practices In doing so this book gives an overview on and examine peer review and asks how it can move forward This is an open access book **Educating Citizen Designers in South Africa** Elmarie Costandius,Herman Botes,2018-09-07

Educating Citizen Designers in South Africa is the first book of its kind to appear in post apartheid South Africa and it is therefore both overdue and extremely welcome The book aims at sharing critical citizenship design teaching and learning pedagogies by including contributions from a range of design educators and one student who work in different design disciplines such as architecture graphic and product design Critical citizenship education is explicated in relation to a range of theories and new and existing models Numerous contemporary case studies and examples of design projects from a range of South African Higher Education Institutions are included As such a variety of perspectives emerge including the

consensual where the aim of critical citizenship education is viewed as promoting social justice shared values and critical thinking to the conflicting where critiques are levelled against conceptions of critical citizenship education Contentious contesting and contradictory views are inevitable and necessary given the South African context as it is only in open debate that the one point of agreement among the authors the need for social change can be worked towards Prof Deirdre Pretorius Univeristy of Johannesburg *ECRM2016-Proceedings of the 15th European Conference on Research Methodology for Business Management* " Vladlena Benson, Fraggiskos Filippaios, 2016-05-20 **Simulation and Modeling Methodologies, Technologies and Applications** Mohammad S. Obaidat, Tuncer Ören, Yuri Merkurjev, 2017-10-26 This Proceedings book reports on new and innovative solutions regarding methodologies and applications of modeling and simulation It includes a set of selected extended papers from the 6th International Conference on Simulation and Modeling Methodologies Technologies and Applications SIMULTECH 2016 held in Lisbon Portugal from 29 to 31 July 2016 The conference brought together researchers engineers and practitioners interested in methodologies and applications of modeling and simulation SIMULTECH 2016 received 76 submissions from 35 countries and all continents After a double blind paper review performed by the Program Committee 18% were accepted as full papers and thus selected for oral presentations Additional papers were accepted as short papers and posters A further selection was made after the Conference based also on the assessment of presentation quality and audience interest so that this book includes the extended and revised versions of the very best papers from SIMULTECH 2016 *Open Source Systems: Integrating Communities* Kevin Crowston, Imed Hammouda, Björn Lundell, Gregorio Robles, Jonas Gamalielsson, Juho Lindman, 2016-05-16 This book constitutes the refereed proceedings of the 12th International IFIP WG 2.13 International Conference on Open Source Systems OSS 2016 held in Gothenburg Sweden in May June 2016 The 13 revised full papers presented were carefully reviewed and selected from 38 submissions The papers cover a wide range of topics related to free libre and open source software including organizational aspects of communities organizational adoption participation of women software maintenance and evolution open standards and open data collaboration hybrid communities code reviews and certification *Sustainable Modernity* Nina Witoszek, Atle Midttun, 2018-04-17 The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/9781351765633> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license In the 21st century Norway Denmark and Sweden remain the icons of fair societies with high economic productivity and quality of life But they are also an enigma in a cultural evolutionary sense though by no means following the same socio economic formula they are all cases of a non hubristic socially sustainable modernity that puzzles outside observers Using Nordic welfare states as its laboratory Sustainable Modernity combines evolutionary and socio cultural perspectives to illuminate the mainsprings of what the authors call the well being society The main contention is that the Nordic uniqueness is not merely the outcome of one particular set of historical institutional or political arrangements or sheer historical luck rather the high welfare

creation inherent in the Nordic model has been predicated on a long and durable tradition of social cooperation which has interacted with global competitive forces Hence the socially sustainable Nordic modernity should be approached as an integrated and tightly orchestrated ecosystem based on a complex interplay of cooperative and competitive strategies within and across several domains normative cultural socio political and redistributive The key question is Can the Nordic countries uphold the balance of competition and cooperation and reproduce their resilience in the age of globalization cultural collisions the digital economy the fragmentation of the work life division and often intrusive EU regulation With contributors providing insights from the humanities the social sciences and evolutionary science this book will be of great interest to students and scholars of political science sociology history institutional economics Nordic studies and human evolution studies
