Language is the most human invention Spontaneous unruly passionate and erratic it resists every attempt to discipline or regularize it a history celebrated here in all its irreverent glory Language is a wild thing It is vague and anarchic Style meaning and usage are continually on the move Throughout history for every mutation idiosyncrasy and ubiquitous mistake there have been countervailing rules pronouncements and systems making some attempt to bring language to heel From the utopian language builder to the stereotypical grammatical stickler to the programmer trying to teach a computer to translate Lane Greene takes the reader through a multi disciplinary survey of the many different ways in which we attempt to control language exploring the philosophies motivations and complications of each The result is a highly readable caper that covers history linguistics politics and grammar with the ease and humor of a dinner party anecdote Talk on the Wild Side is both a guide to the great debates and controversies of usage and a love letter to language itself Holding it together is Greene's infectious enthusiasm for his subject While you can walk away with the finer points of who says whom and the strange history of buxom schoolboys most of all it inspires awe in language itself for its elegance resourcefulness and power
