Bray, 2015-06-26 Excerpt from A Laboratory Manual of General Chemistry for Use in Colleges The present laboratory manual has been prepared primarily for the use of students in general inorganic chemistry in the University of California These students have usually had a year in elementary chemistry in high school and many of them will take no further work in chemistry No distinction is made between students on the basis of the various curricula which they are following as we believe that a course in the fundamentals of general chemistry is equally suitable for all students The laboratory and lecture work are correlated as closely as possible In the present manual page references are given to Professor Joel H Hildebrand's Principles of Chemistry MacMillan 1918 the reference book written for the course The laboratory work is a study of chemical principles rather than a presentation of descriptive material It is hoped that the division of the manual into Sections and the statements in the first paragraphs of the various Assignments will materially assist the student in recognizing the relation between the experimental details and the principles involved When the course extends over two terms as at the University of California a satisfactory division is to take Sections I to III in the first term

though in some cases it may be possible also to begin the first Assignment on Qualitative Analysis It is recommended that the Assignments in the last two Sections be taken in the order noted in the text The following editions of the manual have been printed Laboratory Directions in Chemistry 1 A edited by William C Bray 1915 21 Assignments A Laboratory Manual of General Chemistry William C Bray and Ludwig Rosenstein 1916 26 Assignments The same revised by William C Bray 1917 31 Assignments reprinted 1918 1919 1920 The present manual contains 5 Sections with a total of 30 Assignments and is an almost complete revision of the 1917 manual In the development of this manual from 1912 to the present time a great deal has been contributed by the instructors in the course We wish especially to acknowledge our indebtedness to Professors G N Lewis H Hildebrand Edward Booth and E D Eastman and to Doctors Ludwig Rosenstein and V L Argo About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
