Ramp Hollow Steven Stoll, 2017-11-21 How the United States underdeveloped Appalachia Appalachia among the most storied and yet least understood regions in America has long been associated with poverty and backwardness But how did this image arise and what exactly does it mean In Ramp Hollow Steven Stoll launches an original investigation into the history of Appalachia and its place in U S history with a special emphasis on how generations of its inhabitants lived worked survived and depended on natural resources held in common Ramp Hollow traces the rise of the Appalachian homestead and how its self sufficiency resisted dependence on money and the industrial society arising elsewhere in the United States until beginning in the nineteenth century extractive industries kicked off a scramble for Appalachia that left struggling homesteaders dispossessed of their land As the men disappeared into coal mines and timber camps and their families moved into shantytowns or deeper into the mountains the commons of Appalachia were in effect enclosed and the fate of the region was sealed Ramp Hollow takes a provocative look at Appalachia and the workings of dispossession around the world by upending our notions about progress and development Stoll ranges widely from literature to history to economics in order to expose a devastating process whose repercussions we still feel today

Colonial Mississippi Christian Pinnen, Charles Weeks, 2021-03-02 Colonial Mississippi A Borrowed Land offers the first composite of histories from the entire colonial period in the land now called Mississippi Christian Pinnen and Charles Weeks reveal stories spanning over three hundred years and featuring a diverse array of individuals and peoples from America Europe and Africa The authors focus on the encounters among these peoples good and bad and the lasting impacts on the region The eighteenth century receives much deserved attention from Pinnen and Weeks as they focus on the trials and tribulations of Mississippi as a colony especially along the Gulf Coast and in the Natchez country The authors tell the story of a land

borrowed from its original inhabitants and never returned. They make clear how a remarkable diversity characterized the state throughout its early history. Early encounters and initial contacts involved primarily Native Americans and Spaniards in the first half of the sixteenth century following the expeditions of Columbus and others to the large region of the Gulf of Mexico. More sustained interaction began with the arrival of the French to the region and the establishment of a French post on Biloxi Bay at the end of the seventeenth century. Such exchanges continued through the eighteenth century with the British and then again the Spanish until the creation of the territory of Mississippi in 1798 and then two states, Mississippi in 1817 and Alabama in 1819. Though readers may know the bare bones of this history, the dates and names, this is the first book to reveal the complexity of the story in full, to dig deep into a varied and complicated tale. **Reconstructing the**

Landscapes of Slavery Dale W. Tomich, Rafael de Bivar Marquese, Carlos Venegas Fornias, Reinaldo Funes

Monzote, 2021-03-19. Assessing a unique collection of more than eighty images, this innovative study of visual culture reveals the productive organization of plantation landscapes in the nineteenth-century Atlantic world. These landscapes, from cotton fields in the Lower Mississippi Valley to sugar plantations in western Cuba and coffee plantations in Brazil's Paraíba Valley, demonstrate how the restructuring of the capitalist world economy led to the formation of new zones of commodity production. By extension, these environments radically transformed slave labor and the role such labor played in the expansion of the global economy. Artists and mapmakers documented in surprising detail how the physical organization of the landscape itself made possible the increased exploitation of enslaved labor. Reading these images today, one sees how technologies combined with evolving conceptions of plantation management that reduced enslaved workers to black bodies. Planter control of enslaved people's lives and labor maximized the production of each crop in a calculated system of production. Nature too was affected: the massive increase in the scale of production and new systems of cultivation increased the land's output. Responding to world economic conditions, the replication of slave-based commodity production became integral to the creation of mass markets for cotton, sugar, and coffee, which remain at the center of contemporary life.
