Electricity in the 17th and 18th Centuries J. L. Heilbron, 2023-11-15 Electricity in the 17th and 18th Centuries A Study of Early Modern Physics examines the development of electricity during the Scientific Revolution offering a comprehensive analysis of its evolving understanding The study unfolds in three stages the first until 1700 was marked by narrow exploration and premature attempts to systematize electrical phenomena the second spanning the early 18th century saw the discovery of new phenomena that couldn't be explained by existing philosophies with experimental philosophers at the forefront and the third stage by the late 18th century saw electricity being quantified particularly in the realm of electrostatics The book provides an insightful account of the transition from theoretical abstraction to practical experimentation highlighting the slow and incremental progress made by scientists in understanding electricity culminating in the work of figures like Franklin Cavendish and Coulomb The book delves into the institutional and intellectual frameworks that shaped the study of electricity during these centuries emphasizing the significant role of the Catholic Church particularly the Jesuits in fostering experimental physics It explores the challenges early electricians faced such as inconsistent results caused by external factors like humidity and the peculiarities of materials like glass and gems The author also scrutinizes the development of electrical theories including the transition from effluvial models to more modern quantifiable concepts like charge capacity and tension By analyzing the Leyden jar and other key apparatus the book traces how these tools helped clarify the nature of electricity contributing to the eventual acceptance of Newtonian approaches to electrical theory This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979

The Interpretation of the Bible Joze Krasovec, 1999-10-01 This unique volume nearly 2000 pages in length and handsomely printed on Bible paper is perhaps the most comprehensive scholarly work of our time on the translation and interpretation of the Bible At its core are papers presented to an international symposium in Ljubljana in September 1996 to mark the publication of the new Slovenian version of the Bible a landmark in Slovene identity and cultural life In addition its distinguished editor Joze Krasovec has commissioned a wide range of contributions devoted to translations of the Bible in many languages including the Slavonic languages Croatian Czech Hungarian Polish and the Scandinavian languages The 82 chapters in this work mostly in English are divided into three parts Part I on ancient translations and hermeneutics of the Bible contains contributions by M E Boismard S P Brock K J Cathcart R P Gordon L J Grech M Hengel O Keel J Lust E Tov and others with a notable comprehensive bibliographic survey of oriental Bible translations from the first millennium by M van Esbroeck Part II on Slavonic and other translations of the Bible includes the first detailed study of the history of the Slavonic Bible by Francis J Thomson over 300 pp Part III with essays by such scholars

as J H Charlesworth D J A Clines J Gniska M Grog N Lohfink and A C Thiselton concerns the interpretation of the Bible in translation philosophy theology art and music In an appendix a complete list of printed Bibles in languages throughout the world is presented for the first time Anticolonial Form Alexandra Reza,2024-01-24 Anticolonial Form Literary Journals at the End of Empire addresses the relationship between culture and politics in two journals published in Europe by African writers Presence Africaine launched in Paris in 1947 and Mensagem published between 1948 and 1964 in Lisbon Grounded in extensive archival work the book argues for a comparative and transnational approach to postcolonial literary studies for the significance of the literary journal as a key form in the development of African writing in French Portuguese and English and for a historically and geographically contingent understanding of the relationships between literature culture and politics This book takes up the idea of articulation to bring forward the contingent and fugitive connections that networks of literary journals fostered between francophone anglophone and lusophone writers in the conjuncture of decolonization in the 1950s and 1960s It argues that comparison as a praxis and a method was central to the anticolonial charge of those journals on whose pages we see an iterative back and forth between writing from and about different parts of the colonial world a recursive effort to establish how ideas and analyses developed in one part of the colonial world could travel and be adopted and adapted in others Many scholars have argued convincingly that the institutionalized practice of comparison in the academic field of comparative literature is itself imbricated with histories of colonialism Reza s argument takes on a particular significance in the context of that critique as the anticolonial comparison on which she focuses offers a different tradition of relational praxis from which to think about connection and comparison itself **Discovering French: level 2**
