**Extracting Stone** Anne S. Dowd, Mary Beth D. Trubitt, 2024-04-04 A comprehensive view of quarrying activities from three key regions in North America This exciting new addition to the the American Landscapes series provides an in depth account of how flintknappers obtained and used stone based on archaeological geological landscape and anthropological data Featuring case studies from three key regions in North America this book gives readers a comprehensive view of quarrying activities ranging from extracting the raw material to creating finished stone tools Quarry landscapes were some of the first large scale land modification efforts among early peoples in the New World The chronological time periods covered by quarrying activities show that most intensive use took place during parts of the Archaic and Woodland periods or between roughly 4000 1000 years ago when denser populations existed but use began as early as the Paleoindian Period about 13 000 9000 years ago and ended in the Historic or Protohistoric periods when colonists and Native Americans mined chert for gunflints and sharpening stones or abrasives From the procurement systems approach common in the 1980s and 1990s archaeologists can now employ a landscape approach to quarry studies in tandem with Geographic Information Systems GIS computer mapping and digital analysis Light and RADAR LiDAR airborne laser scanning for recording topography or high resolution satellite imagery Authors Dowd and Trubitt show how sites functioned in a broad landscape context which site locations or raw material types were preferred and why what cultures were responsible for innovative or intensive quarry resource extraction as well as how land use changed over time Besides discussions of the way that industrialists used natural resources to change their technology by means of manufacture trade and exchange examples are given of heritage sites that people can visit in the United States and Canada

**Ancient Mesoamerican Population History** Adrian S.Z. Chase, Arlen

F. Chase, Diane Z. Chase, 2024-05-07 This book critically re-examines Mesoamerican archaeological approaches to estimating populations associated with ancient cities, settlement systems and regions. Archaeological data and lidar are both employed to demonstrate how complex ancient Mesoamerican societies were and how they changed over time. **Body Sensor**

**Networking, Design and Algorithms** Saeid Sanei, Delaram Jarchi, Anthony G. Constantinides, 2020-07-13 A complete guide to the state of the art theoretical and manufacturing developments of body sensor network design and algorithms. In *Body Sensor Networking: Design and Algorithms*, professionals in the field of Biomedical Engineering and e-health get an in-depth look at advancements, changes and developments. When it comes to advances in the industry, the text looks at cooperative networks, noninvasive and implantable sensor microelectronics, wireless sensor networks, platforms and optimization, to name a few. Each chapter provides essential information needed to understand the current landscape of technology and mechanical developments. It covers subjects including Physiological Sensors, Sleep Stage Classification, Contactless Monitoring and much more. Among the many topics covered, the text also includes additions such as over 120 figures, charts and tables to assist with the understanding of complex topics. Design examples and detailed experimental works are included. A companion website featuring MATLAB and selected data sets is also provided. Additionally, readers will learn about wearable and implantable devices, invasive and noninvasive monitoring, biocompatibility and the tools and platforms for long-term, low-power deployment of wireless communications. It is an essential resource for understanding the applications and practical implementation of BSN when it comes to elderly care, how to manage patients with chronic illnesses and diseases, and use cases for rehabilitation. **Spatial**

**Approaches in African Archaeology** Cameron Gokee, Carla Klehm, 2023-01-01 This book explores the interplay between African archaeology and geospatial methods from three broad perspectives. First, several contributors examine the technical possibilities and limits of using satellite imagery to detect archaeological sites and model their physical environs. A second perspective is the integration of new geospatial data and methods into site and landscape scale analyses to better address questions about social organization and subjective experience in African pasts. A final perspective considers the interplay between geospatial technologies and community archaeology in Africa. Recognizing that GIS and RS supersede traditional divisions in African archaeology such as different periods, geographic regions and theoretical orientations, the chapters aim to be widely applicable. Arranged by methodological emphasis, the case studies move from technical discussions of specific geospatial tools to general applications for addressing specific sociohistorical topics. Each chapter clearly explains the links between their archaeological questions and analytical methods as well as how their results advance our understanding of African pasts and heritage resources. Many of the chapters can serve as learning models for archaeologists who are new to GIS or curious about its applications to their work. Others represent recent advances in geospatial applications of greater interest to more seasoned GIS practitioners, demonstrating the potential for African scholarship to contribute to methodological innovations. This book is of interest to students and researchers of African and historical archaeology and

Brown,2023-08-21 When high magnitude meteorological hazards impact vulnerable human populations disasters are the inevitable consequence Through archaeological and historical evidence this book investigates how these sudden and unpredictable events affected British medieval populations AD 1000 1500 Medieval society understood disasters in a practical sense and took steps to minimise risk by constructing flood defences and reinforcing structures damaged by storms At the same time natural hazards were widely interpreted through a framework of religious and superstitious beliefs and a wide variety of measures were followed to secure protection against the dangers of the natural world Disasters therefore were interpreted through a duality of understanding in which their occurrence could be the result of spiritual or superstitious triggers but practical solutions were a key component in mitigating their tangible impacts In evaluating this duality this book focuses on specific case studies and considers both their diverse historical contexts as well as their consequences for society against the backdrop of significant demographic and climatic change as a result of the Black Death and the transition to the Little Ice Age **The International Journal of Indian Psychology, Volume 4, Issue 2, No. 87** IJIP.In,2017-02-23 Knowledge Socialism Michael A.
