How the Vote Was Won Rebecca Mead,2006 Uncovers how women in the West fought for the right to vote By the end of 1914 almost every Western state and territory had enfranchised its female citizens in the greatest innovation in participatory democracy since Reconstruction These Western successes stand in profound contrast to the East where few women voted until after the ratification of the Nineteenth Amendment in 1920 and the South where African American men were systematically disenfranchised How did the frontier West leap ahead of the rest of the nation in the enfranchisement of the majority of its citizens In this provocative new study Rebecca J Mead shows that Western suffrage came about as the result of the unsettled state of regional politics the complex nature of Western race relations broad alliances between suffragists and farmer labor progressive reformers and sophisticated activism by Western women She highlights suffrage racism and elitism as major problems for the movement and places special emphasis on the political adaptability of Western suffragists whose improvisational tactics earned them progress A fascinating story previously ignored How the Vote Was Won reintegrates this important region into national suffrage history and helps explain the ultimate success of this radical reform **Congruent**

Michigan Bibliography Michigan Historical Commission,1921 *Forging Radical Alliances Across Difference* Jill M. Bystydzienski,Steven P. Schacht,2001 As we enter the twenty first century scholars activists and others concerned with social change increasingly realize that in order to transform society effective coalitions among different groups working for social justice need to be created and maintained However most of the research and writing about coalitions provide rather limited approaches to the study and understanding of radical alliances i e coalitions whose goals are to fundamentally change interpersonal relations and social structure in order to achieve equality and true social justice This anthology challenges dominant approaches of explaining social movements and coalition building Based on numerous case studies of alliances created between disparate peoples and among a variety of groups the authors show that both resource mobilization theories and identity politics frameworks for the most part are inadequate for conceptualizing how alliances have been and can be created across boundaries of gender race ethnicity class nationality ideology sexual orientation and age The theoretical

approach we propose suggests that coalitions are fluid sites of collective behavior where the blending of multiple identities with political activism interact with structural conditions to influence the development of commitments strategies and specific actions This analogy makes a contribution to a body of knowledge that aims to understand and explain how radical coalitions work in order to enable the development of visions and plans for change that advance and sustain political and social activity
