Ownership and Governance of Companies Jonathan Michie,Vishnu Padayachee,2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics **Compliance with**

Etosha Pan to the Skeleton Coast Sian Sullivan, Ute Dieckmann, Selma Lendelvo, 2024-08-02 Etosha Pan to the Skeleton Coast examines the conservation histories and concerns of one of southern Africa's most iconic conservation regions: the variously connected Etosha-Kunene areas of north-central and north-west Namibia. This cross-disciplinary volume brings together contributions from a Namibian and international group of scholars and conservation practitioners working on topics ranging from colonial histories to water management, perceptions of wildlife, and the politics of belonging. Together, these essays confront a critical question: how can the conservation of biodiversity-rich landscapes be reconciled with historical injustices of social exclusion and marginalisation? The book is organised in five parts: the first provides a historical backdrop for the book's detailed case studies focusing on environmental and conservation policy and legislation; the second investigates post-Independence approaches to conservation; the third focuses on Etosha-Kunene ecologies and related management issues; the fourth explores how historical circumstances shape present conservation and cultural landscapes; and the fifth addresses contemporary complexities of lion conservation and community-based natural resource management (CBNRM). By offering a comprehensive overview of evolving conservation boundaries, policies, and practices in the region, this timely volume paves the way for the future design of conservation initiatives that more fully consider and integrate historical and cultural knowledge and diversity. Essential reading for conservation practitioners, policymakers, and academic researchers alike, this volume also serves as a valuable resource for university students interested in conservation studies and
