University Of Venda Prospecture:

Language and Institutional Identity in the Post-Apartheid South African Higher Education Leketi Makalela, 2022-03-21
This book examines the intersections between education identity formation and language in post apartheid South Africa with specific attention to higher education. It does so against the backdrop of the core argument that the sector plays a critical role in shaping re producing and perpetuating sectoral class sub national and national identities which in turn in the peculiar South African setting are almost invariably analogous with the historical fault lines determined and dictated by language as a marker of ethnic and racial identity. The chapters in the book grapple with the nuances related to these intersections in the understanding that higher education language policies overt and or covert largely structure institutional cultures or what has been described as curriculum in higher education institutions. Together the chapters examine the roles played by higher education by language policies and by the intersections of these policies and ethnolinguistic identities in either constructing and perpetuating or deconstructing ethnolinguistic identities upon which the sector was founded. The introductory chapter lays out the background to the entire book with an emphasis on the policy and practice perspectives on the intersections. The middle chapters describe the so called White Universities Black Universities and Middle Man Minorities Universities. The final chapter maps out future directions of the discourses on language and identity formation in South Africa s higher education.

The Strategic Repositioning of Arts, Culture and Heritage in the 21st Century George Mugovhani, Owen Seda, 2018-06-11
The post millennium world has been experiencing several recognisable historical milestones with regard to arts culture and heritage. One of these has been the resuscitation and revival of creative elements of the arts culture and heritage of previously marginalised or disadvantaged communities around the world. Until recently there had been scant regard and skewed allocation of resources for these but lately attempts have been made to promote and sustain them in order to enable the socio economic aspirations of a multicultural society. The contributions brought together here are the product of papers that were presented during a conference on Strategic Repositioning of Arts Culture and Heritage in the 21st Century. They cover a broad spectrum of subjects such as indigeneity music song and identity politics national reconciliation education product development and national development.
