

Graduate Program in Mathematics at University of Arizona

Come study Mathematics at the University of Arizona in Tucson!

- All incoming PhD students are invited to a 5-day "Integration Workshop" to meet your colleagues and begin your graduate experience.
- All PhD students complete a project in their second year to ensure an early introduction to research.
- Tucson has more than 300 sunny days per year and is surrounded by several mountain ranges with peaks over 9,000 feet.

Research

- **Algebra and Geometry:** group theory, number theory, arithmetic and algebraic geometry, topology and geometry
- **Analysis:** analysis and its applications, dynamical systems, geometric analysis, mathematical physics
- **Applied Mathematics:** computational science and numerical analysis, fluids and mechanics, mathematical biology, nonlinear waves, optical science
- **Mathematics Education:** K-12 education, undergraduate education, equity, outreach and informal mathematics, teacher education
- **Probability and Statistics:** stochastic processes, machine learning, random graphs, probability models and applications, data science

Outreach

Many of our students are involved in outreach activities including K-12 classroom visits, math circles, teacher circles, public events, and workshops.

Funding

PhD students are funded through a combination of sources including teaching assistantships, research assistantships, outreach assistantships, and fellowships. Teaching assistants may have their own sections that they teach, and have the opportunity to teach a variety of math courses. Research assistantships are supported by individual and training grants. Other funding opportunities include funding to do outreach to local schools (supported by the college, industrial sponsors, or NSF/NASA, etc.) training (such as the NIH/NIGMS Training Grant in Computational Biology), paid internships, or university initiatives (such as Graduate Access and University Fellows Program).

Job Placement

Recent PhD graduates from the UA program are employed in academic positions (Dartmouth College, Savannah College of Art and Design, Ben-Gurion University, New York University of Global Public Health), industry (Raytheon, Wells Fargo, American Express, CIT Bank, Google), and government (NSA, Mexican National Institute of Public Health).

Diversity Commitment

We encourage applications from traditionally under-represented groups. There are some unique funding opportunities for members of such groups including Graduate Access Fellowships for students who are first generation college students, have financial need, or have had other significant disadvantages or challenges. The UArizona School of Mathematical Sciences is a Silver Center Member of the Math Alliance Center and students who are part of the Math Alliance can apply for an application fee waiver. The University of Arizona is a Hispanic Serving Institution. Graduate students have an active chapter of the Association for Women in Mathematics (AWM).

TechniUM., 1974 **Princeton Alumni Weekly**, 1960 **Abstracts of Papers Presented to the American Mathematical Society** American Mathematical Society, 2001 *The Theory of Oligopoly with Multi-Product Firms* Koji Okuguchi, Ferenc Szidarovszky, 2012-12-06 In the mid 1960's both authors undertook independent works in oligopoly and game theory However it was not until 1983 that they formally met Since then they have continued meeting either in Budapest or Tokyo Their collaboration has resulted in numerous publications as well as in this work Essentially this book has two origins First it originated in previous results either published or circulated in mimeograph form Finely sifting their results the authors constructed a concise reinterpretation of their achievement to date However this unifying process led to the second origin Reconsideration particularly in this comprehensive approach generated new results This was especially

true in the analysis of the existence uniqueness and global stability of the Cournot Nash equilibrium for oligopoly with multi product firms and for several modified Cournot and related models This book should be ideal for graduate students in economics or mathematics However as the authors have firmly grounded their ideas in the formal language of mathematics the student should possess some background in calculus linear algebra and ordinary differential and difference equations Additionally the book should be useful to researchers in oligopoly and game theory as well as to mathematically oriented economists The methodology developed for analyzing the existence and stability of oligopoly equilibrium should prove useful also in theoretical analysis of other economic models We are both very grateful to Professor Wilhelm Krelle for his careful review and helpful suggestions In addition Koji Okuguchi wishes to thank Professors W Adrift William C.

Harris, 2011-07-05 This timely book not only diagnoses the critical systemic weaknesses plaguing America but also lays out a workable blueprint for tackling the critical challenges we face today With the intent of spurring a constructive national dialogue the authors examine how We Americans can be jolted out of our complacency and motivated to bold action and common purpose Government can work in concert with industry to foster innovation and pursue critical goals We can elevate the quality of our educational system to meet new challenges We must encourage the best and the brightest immigrants from around the world to participate in the nation's future Individual cities and states are showing the way forward based on local initiatives This book is more than a compelling narrative and a candid look at our current malaise It is an inspiring call to action on how we as a nation can once again attain our full potential and thrive American Men of Science ,1949
