The Changing Space Economy of City-Regions Koech Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges The book s

focus on understanding the overall character of Gauteng City Region's Space Economy through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region. It covers the disparities exacerbated by an overlay of apartheid planning ideology and top-down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results. This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant place-based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level. This book should appeal to urban studies specialists, economists and development studies researchers in the Global South.

UNESCO science report UNESCO, 2015-11-09. There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

Lux, 2016-05-09 Separate Beds is the shocking story of Canada's system of segregated health care Operated by the same bureaucracy that was expanding health care opportunities for most Canadians the Indian Hospitals were underfunded understaffed overcrowded and rife with coercion and medical experimentation Established to keep the Aboriginal tuberculosis population isolated they became a means of ensuring that other Canadians need not share access to modern hospitals with Aboriginal patients Tracing the history of the system from its fragmentary origins to its gradual collapse Maureen K Lux describes the arbitrary and contradictory policies that governed the Indian Hospitals the experiences of patients and staff and the vital grassroots activism that pressed the federal government to acknowledge its treaty obligations A disturbing look at the dark side of the liberal welfare state Separate Beds reveals a history of racism and negligence in health care for Canada's First Nations that should never be forgotten Classicism and the Construction of Capital Cities Richard Alston, 2025-05-15 Exploring the intriguing interplay between tradition and modernity in the 19th century capitals of London Athens and Rome Richard Alston delves into the political and architectural choices that shaped these cities as representations of self consciously modern nations Politicians and architects invested in classical styles in their efforts to break with traditions and assert new values Classical style was employed to address questions of urbanism and nation citizenship and belonging and history and civilization The story of 19th century architectural Classicism offers a compelling narrative of utopian dreams clashing with authoritarian politics to generate the complexities of modern urban landscapes Through these three case studies this book illuminates how Classicism became a potent tool for expressing elitist nationalism in London excluding Greeks from their own capital in Athens and reinforcing aspiration to a technocratic new Rome As such grand visions collided with modern urban realities Alston unravels the mythic allure and ultimate failure of these utopian endeavours This book presents a riveting exploration of the architectural choices that reflected the aspirations and challenges of a rapidly changing world leaving a lasting impact on the capitals and their nations **Region-Building in Africa** Daniel H. Levine, Dawn Nagar, 2016-05-19 This landmark book is the first of its kind to assess the challenges of African region building and regional integration across all five African sub regions and more than five decades of experience considering both political and economic aspects Leading scholars and practitioners come together to analyze a range of entwined topics including the theoretical underpinnings that have informed Africa's regional integration trajectory the political economy of integration

including the sources of different waves of integration in pan Africanism and the reaction to neo liberal economic pressures the complexities of integration in a context of weak states and the informal regionalization that often occurs in borderlands the increasing salience of Africa s relationships with rising extra regional economic powers including China and India and comparative lessons from non African regional blocs including the EU ASEAN and the Southern Common Market A core argument of this book running through all chapters is that region building must be recognized as a political project as much as if not more than an economic one successful region building in Africa will need to include the complex political tasks of strengthening state capacity including states capacity as developmental states that can actively engage in economic planning resolving long standing conflicts over resources and political dominance improving democratic governance and developing trans national political structures that are legitimate and inclusive

Recalibrating teacher training in African higher education institutions Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimaged to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark
