Universities and Global Human Development Alejandra Boni, Melanie Walker, 2016-04-14 This book makes the case for a critical turn in development thinking around universities and their contributions in making a more equal post 2015 world It puts forward a normative approach based on human development and the capability approach one which can gain a hearing from policy scholarship and practitioners dealing with practical issues of understanding policy democratising research and knowledge and fostering student learning all key university functions The book argues that such an approach can elucidate development debates drawing on local national and international issues and examples to show why higher education matters for sustainable development goals both in

educational and social terms It advocates a new arena of engagement with universities as key sites of development and freedoms beyond human capital and challenges development omissions and gaps around university education The book explores how the human development approach addresses the following core ideas the meaning of well being the idea of agency participation and democratic citizenship how to address inequalities the relation between local and global and the idea of equitable partnerships This book is addressed to researchers and postgraduate students in development studies university education the capability approach and human development community *A Scientific Bibliography of the Waterberg, Makgabeng Plateau, Blouberg and Soutpansberg* Rodney Moffet, 2025-06-16 The Scientific Bibliography of the Waterberg Makgabeng Plateau Blouberg and Soutpansberg follows two similar bibliographies of other mountain areas of South Africa This bibliography is particularly relevant as it covers many disciplines in two recently declared Biosphere Reserves by UNESCO namely Waterberg and Vembe *Women and Militancy* Basuli Deb, 2007 *Psychosocial Pathways Towards Reinventing the South African University* Sabrina Liccardo, 2020-11-02 This book proposes a conceptual empirical framework for exploring forms of continuity and change along psychosocial pathways in South African universities It illustrates how the psychosocial pathways are grounded in the symbolic narratives and knowledges of young scientists engineers and architects all interlocutors in the research from which this book is based Alala Mamoratwa Welile Odirile Kaiya Amirah Takalani Nosakhele Naila Ambani Khanyisile Itumeleng Ethwasa and Kgnaya provide collective standpoints in the multiplicities within and between the lived lives and told stories of young Black South African women in Science Technology Engineering and Mathematics STEM fields In doing so this compelling work advances possibilities for demythologising scientific endeavour as a white male achievement and shifting knowledge communities across gendered racialised class and national divides This book presents an innovative narrative methodology utilising the myth of the Minotaur to examine the state of the university at the heart of the hierarchical labyrinth in post apartheid South Africa Throughout the work the author wrestles with and self reflexively highlights her own positionality as a white middle class South African woman to examine how this affects the production of this research in ways which serve to preserve the colonial knowledge system With the rise of the Rhodes Must Fall and Fees Must Fall student movement in South Africa demanding for the fall of institutionalised racial hierarchies the author uses the cover image of narrative formations in the spirit of exploration to think with and through undulating networked forms that could possibly forge new psychosocial pathways towards decolonising and reinventing South African universities This work offers a unique conceptual and methodological resource for students and scholars of psychosocial and narrative theory as well as those who are concerned about the politics of higher education both in South Africa and in other contexts around the world **Co-teaching and co-research in contexts of inequality** Phindile Zifikile Shangase, Daniela Gachago, Eunice Ndeti Ivala, 2023-05-09 There has been a recent surge of interest in the concept of co teaching and co research across institutions of HE locally and globally as a response to

limited international mobility due to COVID 19 We see co teaching and co research as teaching and research that connects educators and learners across different institutions and different contexts be it across South Africa Africa or the world Co teaching and co research is linked in this book to the term networked learning following the Networked Learning Editorial Collective's emphasis on relationships and collaboration rather than technology and foregrounding our strong commitment to social justice Our collective experiences have shown that co teaching and co research are not easy endeavours especially when they involve differently positioned and differently resourced contexts students and academics While these collaborations are enriching and exciting they need careful support preparation and time for sustained relationship building topics that we find are not necessarily discussed in the literature around co teaching and co research This book is an attempt towards closing this gap in knowledge by providing a range of chapters documenting personal experiences of academics and practitioners engaging in co teaching and co research across the African continent and beyond facilitated by various networked learning tools and technologies Framed by a spirit of sharing and connection the book provides insights into the benefits and challenges of such collaborations affordances of technologies to bridge unequal divides emerging practices of continental collaboration and beyond Additionally the book provides an unusually honest and nuanced view on co teaching and co research across contexts of inequalities foregrounding relationship and community building rather than technology and emphasising the importance of sustained connection and reflection in these collaborations Applying a wide range of critical theoretical frameworks these evidence based but also reflective and reflexive contributions are a unique and important reminder that behind and through our screens we connect as humans who yearn to learn from each other but also need to learn how to learn from each other when we do not share the same world views
