1 From rock to soil

The big picture

This chapter is about rocks and weathering and soil. Here's the big picture ...

- Rock is made of natural compounds called minerals.
- There are many types of rock, but they all fall into just three groups, depending on how they were formed.
- Rock changes from one group to another.
- Over time, rocks get broken down by forces of weathering.
- Different types of rock lead to different scenery.

Your goals for this chapter

By the end of this chapter you should be able to answer these questions:

- What is a mineral? Give at least three examples.
- What are the three groups of rock? How have some of the rocks in each group formed? Name at least one rock in each group.
- What do these terms mean?
weathering physical weathering chemical weathering
erosion deposition sedimentation
- What is the rock cycle? How should be able to describe it, and sketch it.
- What are plates, and why do they move?
- The UK has rocks which was formed in other parts of the world. Why? Why does Britain have mountains? How?
- What type of landscape does the UK have? How should be able to describe the general pattern.
- How does rock type influence the landscape? Give at least two examples.
- What do these terms mean?
soil erosion deposition weathering
- How is soil formed? And why is it so important to humans?

And then ...

When you finish this chapter come back here, and see if you have met your goals!
