Up Prospector 2016:

The Prospector's Wife John Drabble, 2016-11-23 Aileen Mary Eleanor Drabble was a young woman just out of school when in 1911 she immigrated to Canada along with her family They left the comfort of upper class British society to start again in Vancouver then a booming city on the edge of the Canadian frontier Impetuous and headstrong Aileen soon fell in love with a gold prospector Together they embarked on a 40 year adventure marked by both great elation and deep adversity Whether in Vancouver or in the wilderness of BC's interior Aileen known as Mimi to her family left an indelible impression on nearly everyone she met More than 30 years after her death those who knew her still tell stories about her Though never famous she was very much a pioneer whose life in many ways paralleled the journey of her adopted country from a British colony to an independent nation *Rethinking Leadership for a Green World* Andrew Taylor, 2022-03-20

First James Lovelock and recently Prince William and David Attenborough believe that we have reached a tipping point in the process of climate change Whether they are right or not it is certainly true that the impact of humankind upon the ecology of the earth has reached a point where real changes in human behaviour are required If managers are to be enablers of planetary survival then we need to develop a new approach to risk which explicitly includes ecological limits upon economic behaviour This implies a fundamental reorientation of their role in allocating resources to minimise risk and maximise reward This book brings together some of the brightest contemporary thinkers on leadership complexity and sustainability to consider the big ideas that we will need to make the changes required and to outline the major themes that can inform a new approach to constructing a green world It looks at how to ensure that local models of sustainability are able to flourish in the context of global networks and presents specific case studies of markets and organisations that offer insights into the development integrated solutions and the leadership lessons we can learn Combining both theory and practice this book serves to guide business managers and provides deeper insight and critical perspectives on some of the key issues facing leaders moving towards the green economy It also provides useful supplementary reading for students in business and environmental studies
